

# PAY COMMITTEE 2008 

FOR<br>NON-TEACHING EMPLOYEES OF STATEAIDED UNIVERSITIES<br>AND<br>EMPLOYEES OF WEST BENGAL COUNCIL OF HIGHER SECONDARY EDUCATION<br>AND<br>WEST BENGAL BOARD OF SECONDARY EDUCATION

[Constituted in terms of Finance Department Resolution No.8349-F dated 10.11.2008]

# REPORT 

VOLUME I

## CONTENTS

| Chapter | Topic | Page Nos. |
| :---: | :--- | :---: |
| 1 | Introduction | $1-9$ |
| 2 | Working procedure, infrastructure and <br> related matters | $10-23$ |
| 3 | Interim Report | $24-30$ |
| 4 | Pay structure of the employees of <br> Central Govt. and different universities | $31-41$ |
| 5 | Recommendations of 5 State Pay <br> Commission and decision of the State <br> Govt. thereon | $42-50$ |
| 6 | Economic condition of the country, <br> financial responsibility of the Govt. of <br> India and pattern of allocation of <br> revenue to the State | $51-54$ |
| 7 | Resources of the State Govt., the State- <br> aided Universities, West Bengal <br> Council of Higher Secondary Education <br> and West Bengal Board of Secondary <br> Education and the demands thereon on <br> account of their commitment to <br> activities relating to development | $555-59$ |
| 8 | Academic Administration - Pay <br> Committee's approach | $60-70$ |
| 9 | Existing pay structure of the non- <br> teaching employees of the State-aided <br> Universities and employees of Council <br> \& Board | $71-83$ |
| 10 | Construction of pay structure |  |
| 11 | Allowances |  |
| 12 | Date of effect and cost of <br> recommendations | $183-185$ |
| 13 | Summary of recommendations |  |
| 14 | Conclusion $186-190$ |  |
| $191-192$ |  |  |

## CHAPTER I

## INTRODUCTION

1.1 The Government of West Bengal has constituted a Pay committee for the non-teaching employees of the State-aided Universities and employees of the West Bengal Council of Higher Secondary Education and West Bengal Board of Secondary Education vide Finance Department (Audit Branch) Resolution No. 8349-F dated 10.11.08 with the following members:

| 1. | Prof. Amaljyoti Sengupta | - Chairman |
| :--- | :--- | :--- |
| 2. | Shri Rajatkumar Bandyopadhyay | - Member |
| 3. | Shri Jayanta Kumar Dattagupta | - Member-Secretary |

(Appendix - I)
1.2 In the Resolution itself the terms of reference have been specified. The resolution also contains the names of the State-aided Universities and of two other organizations employees of which would fall within the purview of this Pay Committee.
1.3 In a separate Order No.8827-F dt. 25.11.2008 issued by the Finance (Audit) Department, Govt. included the non-teaching employees of Netaji Subhas Open University within the terms of reference of this Committee.
1.3.1 The State Govt. in the Finance Department through its order No.8476-F dated 01.09.2009 included the employees of West Bengal State Council of Rabindra Open Schooling under the terms of reference of this Committee. As this is a very late inclusion, the matters related to this organization could not be dealt with in this volume. Recommendations of the Committee in this regard would be given in the next volume of the report to be submitted shortly.
1.4 The terms of reference of this Committee have been explicitly described in the Resolution No.8349-F dt.10.11.08. The reference relates to examining the present structure of Pay and conditions of service of the employees under purview of the Committee, after taking into account the total package of benefits now available to the employees. The Committee is to suggest changes which may be desirable and feasible keeping in view, interalia, the needs for more people orientation, social accountability and efficiency of the administration, the recommendations of the Fifth Pay Commission and the decisions of the State Govt. taken thereon. present structure of Pay and conditions of service after taking into account the total package of benefits available to the employees of the Universities and the two other organizations which are subject matter of consideration of this Committee.
1.5.1 Another important task included in the terms of reference of the Committee is to examine the existing promotion policies and related issues and suggest changes that may be desirable and feasible after taking into consideration the norms of efficiency/productivity wherever relevant
and having regard to the need for improving people orientation, social accountability and the efficiency of the administration.
1.5.2 Another significant area of the activities of this Committee included in the terms of reference is to examine the allowances, concessions and benefits in addition to the pay and suggest changes which may be desirable and feasible.
1.5.3 Another significant area of activity of the Committee is scrutiny of the retirement benefits of the employees as well as of the teachers and officers of the State-aided Universities as it relates to the emoluments and benefits enjoyed by the superannuated employees.
1.5.4 A special dimension added to the task is the responsibility of the Committee to look into the anomaly, if any, which may be in existence in the pay scales and service conditions of the employees and suggest measures for removing those anomalies. The Committee would examine this aspect in detail but the findings and suggestions may not be incorporated in this volume. It would be incorporated in the volume-2.
1.6.1 As has been mentioned earlier, this Committee is enjoined to have regard to three matters before it makes recommendations on the issues mentioned in the Resolution. While examining the issues related to pay structure, the Committee is required to keep in view, inter-alia, the needs for social accountability and efficiency of the administration at the stage of examination itself. Besides this, the decision of the State Govt. on the
recommendations of the $5^{\text {th }}$ State Pay Commission is also required to be kept in view simultaneously.
1.6.2 The three matters mentioned in the previous sub-para are: -
(a) The prevailing pay structure under the Central and other State Governments as well as that obtaining in different Universities/Higher Secondary Council/ Board of Secondary Education;
(b) The economic condition of the country, financial responsibility of the Govt. of India and the pattern of allocation of revenues to the State and
(c) The resources of the State Govt. as well as of the State-aided Universities, West Bengal Council of Higher Education and West Bengal Board of Secondary Education and the demands thereon on account of their commitment to the developmental activities.

These matters will be dealt with in separate Chapters that follow. Before moving on to other areas, we want to state a few words in respect of social accountability and efficiency of the administration.
1.6.3 Nobody can deny the need for promoting social accountability and efficiency of the administration. But to what extent these needs can be satisfied only through the means available to a Pay Committee is open to question. This is more so when a Committee is examining the Pay structure of the non-teaching employees of a University. In a University there are three distinctly different groups viz., the teaching faculty,
academic administrators (Officers) and the non-teaching employees emoluments only of whom are one of the subject matter of this Committee. So improvement in social accountability and efficiency in the academic area of a University depend largely on the other two players. Inspite of this position, the monetary/financial benefits coupled with higher situation in the administrative hierarchy will definitely act as a motion or force to improve one's performance. There is also no denying of the fact that a poor paid or inadequately paid employee cannot be expected to be either productive or efficient to the desired level. His pay packet should be commensurate with his standard of living as well as should take care of the social needs of at least of his immediate family. But to what extent the quantum of pay makes the recipient socially responsible is very difficult to assess. This is a complex issue and the experts in this field can only throw light on this aspect. This committee proposes to examine the issues pertaining to the promotion policy and norms of promotion, efficiency and productivity. The committee, however, is of the view that a reasonable and improved pay packet may not be the only important factor for achieving efficiency but improvement of pay-packet is definitely one of the primary factors for achieving the expected level.
1.7 In Resolution No.8349-F dated 10.11.2008, the Committee has been asked to submit its recommendations as soon as practicable but preferably within a period of six months from the date of Order notifying the constitution of this Pay Committee. The committee regrets that due to constraints in the timely availability of infrastructural support and to some extent due to lukewarm response from majority of the Universities the task enjoined to the Committee could not be completed within the time frame. This aspect will be dealt with in the Chapter that follows.
1.7.1 In the Resolution the Committee has been given an option to submit interim recommendations if found necessary or if so desired by the Government. This aspect is being dealt with separately in chapter-3.

# APPENDIX -1 

## Government of west Bengal <br> Finance Department Audit Branch

No.: 8349-F
Kolkata, the $10^{\text {th }}$ November, 2008.

## RESOLUTION

The Government of West Bengal have been considering for some time past, the changes that have taken place in the structure of emoluments of the non-teaching employees of the State-aided Universities, employees of the West Bengal Council of Higher Secondary Education and the West Bengal Board of Secondary Education. Conditions have also changed in several respects since the last Pay Committee constituted under Finance Department's Resolutions No.960-F, dated the $24^{\text {th }}$ January, 1996 submitted its report. Accordingly, the Governor has been pleased to constitute a Pay Committee comprising the following :-

1. Prof. Amaljyoti Sengupta, Retired Vice-Chancellor, Bengal Engineering and Science University - Chairman
2. Shri Rajatkumar Bandyopadhyay, Ex-Registrar, Jadavpur University. - Member
3. Shri Jayanta Kr. Dattagupta, WBCS (Ex) Retired - Member Secretary

The terms of the reference of the above Pay Committee will be as follows :-
(i) To examine the present structure of pay and conditions of service after taking into account the total package of benefits available to the nonteaching employees of the State-aided Universities, namely, 1. Calcutta University, 2. Jadavpur University, 3. Burdwan University, 4. North Bengal University, 5. Kalyani University, 6. Rabindra Bharati University, 7. Vidyasagar University, 8. Bidhan Chandra Krishi Viswa Vidyalaya, 9. Bengal Engineering and Science University, 10. West Bengal University of Animal and Fisheries Science, 11. West Bengal University of Technology, 12. West Bengal Health University and 13 North Bengal Krishi Viswa Vidyalaya, as well as employees of the West Bengal Higher Secondary Council and West Bengal Board of Secondary Education and suggest changes which may be desirable and feasible keeping in view, inter alia, the need of benefits for the employees, the needs for more people orientations, social accountability and efficiency of the administration, the recommendations of the Fifth State Pay Commission, as and when available and the decisions of the State Government taken thereon.
(ii) To examine the existing promotion policies and related issues and suggest changes which may be desirable and feasible after taking into consideration the norms of efficiency/productivity, wherever relevant, and having regard to the need for improving people orientation, social accountability and the efficiency of the administration.
(iii) To examine the allowances, concessions and benefits in kind which are available to the employees in addition to the pay and to suggest changes which may be desirable and feasible.
(iv) To examine issues relating to the retirement benefits and
(v) To make recommendations on each of the above having regard, inter alia, to :
a) The prevailing pay structure under the Central and other State Governments as well as that obtaining in different Universities/Higher Secondary Council/Board of Secondary Education.
b) The economic condition of the country, financial responsibility of the Government of India and the pattern of allocation of revenues to the State.
c) The resources of the State Government as well as of the State-aided Universities, West Bengal Council of Higher Secondary Education and West Bengal Board of Secondary Education and the demands thereon on account of their commitment to developmental activities.
3. The Committee will devise its own procedures and may appoint such advisors, institutional consultants and experts as it may consider necessary for any particular purpose, in consultation with the State Government. The Committee may call for such information and take such evidence as may be considered necessary. The Universities, Council, Board and appropriate government departments of the State Government will furnish such information, documents and other assistance as may be required by the Committee. The Government of West Bengal trusts that the Service associations and unions of the employees of the Universities, Council and Board and others concerned will extend to the Committee their fullest co-operation and assistance.
4. The Committee will look into the anomaly, if any, which may be in existence in the pay-scales and service conditions of the employees and suggest measures for removing such anomaly.
5. The Committee will make an estimate of the costs involved in implementing their recommendations and suggest measures for avoidance of wasteful expenditure and other measures for economy. The Committee will also suggest measures for promoting efficiency.
6. The Committee will submit its recommendations as soon as practicable but preferably within a period of six months from the date of order notifying the constitution of the Committee.
7. The Committee may submit interim recommendations if found necessary or if so desired by the Government.

ORDER

Ordered that the resolution be communicated to the concerned administrative departments and to the concerned Universities, the Council and the Board.

Ordered that the resolution be published in the Calcutta Gazette.

By order of the Governor
Sd/- D.Mukhopadhyay
Principal Secretary to the Govt. of West Bengal

## CHAPTER 2

## WORKING PROCEDURE, INFRASTRUCTURE AND RELATED MATTERS

2.1 Considerable time has been taken to arrange accommodation for the Committee. Immediately after the constitution of the Committee the members got in touch with each other. On 02.12.08 the Committee held its first meeting in the residence of Chairman and identified the infrastructure required by the Committee to start with the work. In a letter dated 04.12.08 the Special Secretary, Finance Department was informed of the requirement. As per advice of the Chairman, Member and Member Secretary met officials of Finance Department. We had been informed that Higher Education Department would arrange accommodation for the Committee. We got in touch with the Special Secretary, Higher Education Department. Sometimes in the $3^{\text {rd }}$ week of December, 2008, the Higher Education Department informed us that some space in a building of University of Burdwan was being considered as office premises for the Committee and requested the Committee to offer views about suitability of the space. Chairman and Members of the Committee visited the space and informed Finance Department and Higher Education Department that the space was more or less suitable. In letter No.22-Edn (U) dated 13.01.2009 the Higher Education Department informed the Registrar, Burdwan University that the space had been allotted to the Pay Committee and requested the Registrar to make the space available so that the Committee could start work from 16.01.09. The vacant space to be used as office was however made available on 20.01 .09 after formal inauguration of the building. Though the vacant space was formally made available on 20.01.09, it took some more time for putting in place cubicles to be used by Chairman and Members and also for arranging chairs, tables and other
furniture. The space finally could be made usable from 17.02.09. The Burdwan University Authority had been kind to allow the Committee to use their Conference Room in the ground floor till the space meant for the Committee was made ready. The Chairman and Committee Members started work sitting in a corner of the room and held the $2^{\text {nd }}$ meeting of the Committee in that room on 27.01.09. The Committee however continued its function sitting in the Conference Room till the rooms in the first floor were made ready.
2.2 The Pay Committee was given a complement of staff what cannot even be termed as skeleton staff. Details of staff has been furnished in Appendix - II (Enclosed herein). The paucity of staff did affect the working of the Committee. But the time taken to issue the Govt. Order creating the posts and then time taken in appointing personnel against those posts induced the Committee not to propose for any more staff. The Committee considered it prudent to make to do with whatever was made available to it.
2.3 The terms of reference permitted the Committee to devise its own procedure. In its meeting held on 27.01 .09 (the $2^{\text {nd }}$ meeting of the Committee) the procedure of work i.e. the methodology to be adopted was taken up for discussion. It was decided that this Committee would follow the principles generally followed by the Pay Commissions/Pay Committees in this regard. The procedure would involve (i) inviting through public notice to be published in the Newspapers in the form of advertisement, memoranda containing suggestions, comments and recommendations from Associations, Unions, Institutions, other organizations and interested individuals, (ii) to personally hear the views of those interested Associations/Unions and individuals who would have written memoranda
to the Committee, (iii) collecting relevant data/information from the University and Board of Secondary Education and Council of Higher Secondary Education.

In accordance with the decision taken in the $2^{\text {nd }}$ meeting held on 27.01.09, a notice was issued on 22.02.09 inviting all Unions/Associations of the State-aided Universities. Council of Higher Secondary Education, Board of Secondary Education and individuals who might have a point of view on the issues that concerned this Committee to send their respective opinions, suggestions etc. within a period of one month.

The notice was also displayed in the website of the Finance Department, Govt. of West Bengal.
2.5 Response to this notification inviting memoranda was more or less encouraging. Some of the groups, however, prayed for time to submit addendum etc. They were allowed. Later some groups belonging to different cadres of different Universities approached the Chairman to allow them to submit memorandum. They were allowed submissions of such memoranda. The Committee received 103 memoranda in all. These however included addenda and errata etc. As addenda is actually a part of the original memoranda, the number of memoranda/submissions received by the Committee was 77. The position has been depicted in Annexure-I.
2.6 Before initiating the deliberations on deciding pay structures etc. i.e. before going on for preparation of the instant report, the Committee has heard, in all 67 Unions/Associations/groups of employees, interested organizations and individuals who have submitted memoranda that were
subject matter of consideration of the Committee. All the memoranda were thoroughly analyzed by the Committee before personal hearing.
2.7 The hearing/discussion with those who submitted memorandum commenced on 16.06.2009 and concluded on 06.08.2009. The discussion were facilitated by preparation of detailed analytical note highlighting important points raised by an Association/Union/Group of individuals related to their respective views on their pay structures and allied matters. Those meetings/hearings enabled the Committee acquire a first hand knowledge of their proposals and also of their problems. They were given adequate time to elaborate. Sometimes, the Committee also suggested some alternative probable dispensation to get their reactions.
2.8 As per decisions taken in the meeting held on 27.1.09, for collecting inputs, the Committee requested through its letter No. 12 (16) dated 19.02.2009 Registrars of Universities, and Secretaries of the Higher Secondary Council and Board of Secondary Education to send particulars of the employees of their respective organizations, category-wise in a devised proforma enclosed with the letter. They were requested to send these particulars within 16.3.09. The response the committee did get was very discouraging. We received replies from a few within the stipulated time. Majority of the initial reports were incomplete. Some preferred to send particulars in respect of base posts only. We received report as late as on 11.08.2009 from BESU. The committee originally planned to get and firm up an idea about the prevailing status of the employees, their pay structure, available promotion avenues etc. before starting deliberations with the Unions/Associations. But the Committee had to change its plan of action, though reluctantly, and started the process of hearing. The Committee likes to record in this report that this lukewarm attitude
from some of the Universities coupled with the fact of delayed availability of infrastructural support contributed heavily towards inability of the Committee to submit its report within the preferable time frame. For absence of required inputs from the Universities, there had been occasions when the hearing had to be postponed.
2.9 Due to constraints mentioned in foregoing paras, this part of the report will not cover all the aspects included in the terms of reference. This report contains only those recommendations which concern basically the structure of pay of the non-teaching employees of the Universities and employees of the Council of Higher Secondary Education and Board of Secondary Education. The report also contains recommendations on three major allowances, viz. Dearness Allowance, House Rent Allowance and Medical Allowance.
2.10 The Committee proposes to submit recommendations on all other issues like pension, commutation of pension/retirement gratuity, promotion, career progression, anomalies in pay scales and anomalies in implementation of various Govt. Orders by the Universities in the subsequent part. Inspite of our best efforts we could not collect all the necessary/required information relating to duties, responsibilities and entry qualification of the different cadres and anomalies etc.
2.11 In our letters sent on 05.06.2009, the university authorities were requested to send average monthly expenditure on salaries of the nonteaching employees and financial statement in respect of five financial years. Response to this aspect was also not prompt as a result of which we could not indicate the financial implication in implementing our interim
report. State Govt. however allowed the interim relief without having the indication on cost to be involved.
2.12 After we receive the necessary information the rest of the matters and issues will be considered and recommendations thereon will be submitted in a separate volume. Before finalizing these recommendations we propose to hold discussions with Vice-Chancellors/Registrars/Finance Officers of the Universities and Secretaries of the concerned Govt. Departments or their representatives.

## APPENDIX II

Members of the staff of the Pay Committee, 2008

1. $\quad$ Shri Nanigopal Nanda (Joined On 17.03.2009)

## Section Officer

2. $\quad$ Shri Subhas Bagchi (Joined On 02.03.2009)

## Personal Assistants

3. Shri Pradip Kumar Das - Former Senior Personal Secretary (Joined On 01.04.2009)
4. Shri Gobinda Baidya - Senior Personal

Assistant of Finance Pool (Joined On 08.06.2009)

## Upper Division Assistants

5. $\quad$ Shri Dilip Chandra Modak (Joined On 13.04.2009)
6. $\quad$ Shri Matilal Paul Chowdhury (Joined On 25.02.2009)

## Typist

7. $\quad$ Shri Tatak Chandra Roy (Joined On 02.02.2009)

## Group 'D'

8. $\quad$ Shri Alok Kumar Dutta (Joined On 30.03.2009)
9. $\quad$ Shri Paritosh Kumar Paul (Joined On 09.04.2009)

## Annexure-I

## CHAPTER 3

## INTERIM REPORT

3.1 As mentioned in chapter-1 the clause 7 of the resolution No. 8349 dated 10.11.2008 stipulates that the Committee may submit interim recommendations if found necessary or if so desired by the Government. The committee felt it necessary to submit interim recommendations and submitted two interim recommendations - one in respect of existing employees and the other in respect of superannuated employees.
3.2 The interim recommendations are being narrated below:

## A . Interim Report related to existing employees:

The Pay Committee for non-teaching employees of the State-aided Universities and employees of the West Bengal Council of Higher Secondary Education and the West Bengal Board of Secondary Education constituted as per Finance Department Notification No.8349-F dt.10.11.2008 was to submit its report preferably within six months from the date of Notification of the Order. The Committee held its first meeting on 2.12.2008 and identified the infrastructure including supporting staff required to initiate the work. The State Government in the Finance Department was accordingly informed of the requirement. A room in the Ground floor of the office building of Burdwan University at Salt Lake City was made available by the University Authority on 20.1.2009 for use of the Committee Members
including the Chairman as a make-shift arrangement. The space actually meant for the office of the Committee was made ready on 17.2.2009. As for staff and financial support, nine (9) posts of different categories were created by the Higher Education Department by an Order dated 20.01.2009. Two of them joined in the last week of

February, three in March and three in April, 2009 on the basis of appointment orders issued by Higher Education Department from time to time.
2. The Committee held a meeting on 27.01.2009 in which it was decided that a notification calling for Memoranda from Associations/Unions and individuals having interest in the subject would be published in daily newspapers. It was also decided that the University Authorities would be approached with a request to provide the Committee with particulars of their non-teaching employees in a proforma devised by the Pay Committee. The notice was published in four local Dailies in their edition dated 24.2.2009. Letters to the University Authorities were sent on 19.02.2009 requesting them to send the particulars by 16.02.2009.
3. Inputs from majority of the university authorities have been received by the end of April, 2009. In cases where the reports are incomplete, the concerned authorities have been requested to assure that their reports are complete in all respects. Clarification has been sought in cases where the information received by the Committee appeared to be internally inconsistent. A clear picture will emerge as soon as reply is received from all the universities. The committee is presently engaged in critical examination of the
memoranda submitted by different Unions/Associations and individual employees in response to the Notification published in newspapers. A schedule of interactive sessions has been drawn up to enable the associations and individuals to present their views before the Committee in person. The Pay Committee is preparing itself to look into the existing anomalies in pay scales and service conditions of the employees as per terms of reference and suggest measures for removing such anomalies after an in-depth study of the same. The volume of work demands that adequate time be devoted to cover all aspects of the matter before getting down to formulate the recommendation.
4. Meanwhile, the employees of the State Govt., local Bodies and teachers and non-teaching staff of State-aided schools and colleges are already enjoying the benefit of the revised pay scales in their respective sectors following implementation of the relevant Orders with effect from 1.4.2009. Three Govt. Orders dated 21.05.2009 have been issued by the State Govt. in the Higher Education Department granting "ad hoc interim relief" to teachers and officers of the State-aided Universities with effect from 1.4.2009.
5. The Committee has taken into consideration all aspects mentioned hereinbefore and feels that the present situation makes it imperative to provide some benefit to the category of employees whose pay scales are the subject matter of consideration of the committee to maintain parity with the employees of the sectors mentioned in para- 4.
6.

After careful consideration of the matter, the Committee in its meeting held on 29.5.2009 decides to make an interim recommendation to the effect that, pending finalization of their pay structure, the benefit of an interim relief in the form of an additional pay of an amount equivalent to $\mathbf{3 0 \%}$ of existing basic pay be extended to the non-teaching employees of the State-aided Universities, and employees of West Bengal Council of Higher Secondary Education and West Bengal Board of Secondary Education as are covered by the terms of reference of the Committee, with effect from 1.4.2009. The said interim relief will be adjusted at the time of fixation of pay of the concerned employees which may be made on the basis of the final recommendation of this Committee. The committee likes to make it clear that this additional pay of $30 \%$ of Basic Pay, as recommended by the Committee, will be treated as an integral part of the basic pay for computing DA, HRA, and similar other elements.

## B . Interim Report related to superannuated employees:

The interim recommendation of this Committee dated 29.5.2009 provided for granting an interim relief in the form of an additional pay of an amount equivalent to $30 \%$ of existing basic pay to the serving employees. Different Pensioners' Associations of the Universities have in the meantime made representations for granting interim relief to the retired employees.

In view of the fact that finalization of the recommendation in respect of revision of pension of retired employees would need examination of the matter in further detail, the Committee feels that some financial relief may be given to the retired employees in line with the interim relief as has been offered to the serving employees.
3. The Committee after careful consideration of the matter recommends that, pending finalization of the recommendation relating to pay structures and superannuation benefits, the benefit of an interim relief in the form of additional pension amounting to $20 \%$ of the basic pension/consolidated pension, be granted to the pensioners of the State-aided Universities, pensioners of the west Bengal Council of Higher Secondary Education and West Bengal Board of Secondary Education as are covered by the terms of reference of this Committee with effect from 01.04.2009, provided, however, that no change is made in the amount of dearness pension payable to such pensioners. The said interim relief will be adjusted at the time of fixation of pension of the concerned pensioner which may be made on the basis of final recommendation of this Committee.
4. Dearness Relief shall be payable on the total amount obtained by adding together the existing Basic Pension/Consolidated Pension, Dearness Pension and Additional Pension recommended as interim relief.

## A sample calculation

a) Existing Basic Pension/Consolidated Pension ..... 100
b) Dearness Pension ..... 50
c) Additional Pension recommended herein $20 \%$ of (a) ..... 20
d) Total of (a), (b) and (c) ..... 170e) Dearness Relief on (d) at the prevailing rates.
3.2. We now proceed to make our recommendations in respect of pay-structure, major allowances and in respect of matters related to pension of retired employees. While making our recommendations we have kept in view the decisions of the State Govt. on the recommendations $5^{\text {th }}$ State Pay Commission and simultaneously the uniqueness of the Universities as organizations distinctly different from Govt. Organizations and whose task is to impart education and creation, dissemination and extension of knowledge. Our recommendations will reflect more or less this unique position of the Universities.

## CHAPTER 4

## PAY STRUCTURE OF THE EMPLOYEES OF THE CENTRAL GOVERNMENT, DIFFERENT UNIVERSITIES AS WELL AS OF OTHER HIGHER SECONDARY COUNCIL/BOARD OF SECONDARY EDUCATION.

4.1 As per clause 2(v) of Government Resolution No.8349-F dated 10.11.2008 the Pay Committee is required to make its recommendations having regard to three sets of matters. The first set of matters consists of "the prevailing pay structure of Central and other State Governments as well as that obtaining in different Universities/Higher Secondary Council/Board of Secondary Education". These matters are being considered hereinafter.
4.2 Consequent upon the acceptance of the recommendations of the Sixth Pay Commission by the Central Government albeit, with certain modifications, there has been a sea change in the pay structure under the Central Government.
4.3 We have observed that in the terms of reference two new features viz. Clause 2(B), Clause 2(D) had been included like of which had never been included in the terms of reference of the previous Pay Commissions. The two Clauses are reproduced below:-

2(B) To transform the Central Government Organizations into modern professional and citizen-friendly entries that are dedicated to the service of the people.

2(D) To harmonize the functioning of the Central Government Organizations with the demands of the emerging global economic scenario. This would also take in account, among other relevant factors, the totality of benefits available to the employees, need of rationalization and simplification thereof, the prevailing pay structure and retirement benefits available under the Central Public Sector Undertakings, the economic conditions in the country, the need to observe fiscal prudence in the management of the economy, the resources of the Central Government and the demands thereon on account of economic and social development, defence, national security and the global economic scenario, and the impact upon the finances of the States if the recommendations are adopted by the States.

The earlier Pay Commissions were required to examine work methods and work environments and to suggest rationalization and simplification of them with a view to promoting efficiency and optimizing the size while Clause 2(B) of the terms of reference envisages transforming the Central Government Organizations into modern, professional and citizen friendly entities that are dedicated to the service of the people. It is for the first time that a Pay Commission was asked to consider and suggest measures that would improve the delivery mechanisms which have direct bearing on the services provided by various Government agencies to the common citizens. Again Clause 2(D) of the terms of reference required the Commission to suggest measures to harmonize the functioning of the Central Government Organizations with the demand of the emerging global economic scenario.
4.5 While determining the pay structure of the non-teaching employees of the Universities, the Pay Committee kept in mind the arrival of private including foreign funded Universities in our country in the arena of higher education.
4.6 The major recommendations of the Sixth Pay Commission concerning civilian employees of the Central and which are relevant in formulations of the pay structure of the employees which are subject matters of consideration of this Committee are summarized below :-

## 1. Date of Implementation

Implementation of the revised pay scales to be done retrospectively from $1^{\text {st }}$ January, 2006. Recommendations relating to allowances to be implemented prospectively.

## 2. Running Pay Bands

Introduction of running pay bands for all posts in the Government presently existing in scales below that of Rs.26,000 (fixed). Four distinct running Pay Bands being recommended - one running band each for all categories of employees in groups ' $B$ ' and 'C' (posts in the scale of Rs.5000-8000 have, as a result of delayering and elongation of certain scales, been placed in Group 'B') with 2 running pay bands for Group A posts. All posts presently in Group 'D', after retraining and multi-skilling of the
present incumbents, to be upgraded and placed in the lowest grade of pay band PB-1. The post of Secretary to Government of Indian/equivalent and Cabinet Secretary/equivalent to be kept in distinct pay scales. A separate running pay band, designated as IS scale, is not to be counted for any purpose as no future recruitment is to be made in this grade and all the present Group-D employees not possessing the prescribed qualifications are to be retrained and thereafter upgraded and placed in the Group ' C ' running pay band once they are suitably retrained.

## 3. Minimum and maximum salary

Minimum salary at the entry level of PB-1 pay band to be Rs. 6660 (Rs. 4860 as pay in the pay band plus Rs. 1800 as grade pay). Maximum salary at the level of Secretary/equivalent to be Rs.80,000. The minimum : maximum ratio 1:12.

## 4. Grade Pay and Promotions in Running Pay Bands

All the employees belonging to Groups ' A ', ' B ', ' C ' and ' D ' to be placed in distinct running pay bands. Every post, barring that of Secretary/equivalent and Cabinet Secretary/equivalent to have a distinct grade pay attached to it. Grade Pay (being a fixed amount attached to each post in the hierarchy) is to determine the status of a post (apart from the two apex scales of Secretary/equivalent and Cabinet Secretary/equivalent that do not carry and grade pay) and a senior post being given higher grade pay. The total number of
grades reduced to 20 spread across four distinct running pay bands; one Apex Scale and another grade for the post of Cabinet Secretary/equivalent as against 35 standard pay scales existing earlier. At the time of promotion from one post to another in the same running pay band, the grade pay attached to posts in different levels within the same running pay band to change. Additionally, increase in form of one increment to be given at the time of promotion. A person stagnating at the maximum of any pay band for more than one year continuously to be placed in the immediate next higher pay band without any change in the grade pay.

## 5. Annual Increment

Annual increment to be paid in form of two and half percent of the total of pay in the Pay Band and the corresponding Grade Pay. The date of annual increments, in all cases, to be first of July. Employees completing six months and above in the scale as on July 1 to be eligible.

## 6. Variable increments

Another form of differential increments for Group 'A' Pay Band PB-3, where annual increments in the band will vary depending upon the performance. Eighty percent or more employees in the grade to be allowed normal increment at the rate of $2.5 \%$ with the high performers (not exceeding 20 percent) during the year being allowed increment at the higher rate of $3.5 \%$ Government advised to extend the scheme of variable increments in running pay bands PB-1 and PB-2.

## 7. Holistic nature of recommendations

All the recommendations to be treated as an organic whole as partial implementation will bring in several anomalies and inconsistencies.

## 8. Dearness Allowance

Base year of the Consumer Price Index (CPI) to be revised as frequently as feasible. Formulation of a separate index for Government employees suggested. National Statistical Commission to carry out this exercise.

## 9. Medical facilities

A new medical insurance scheme recommended for Government employees. The scheme to be optional for existing Central Government employees and pensioners. New Government employees and pensioners to be compulsorily covered by the scheme.

## 10. Pension

(i) Fitment formula recommended for serving employees to be extended in case of existing pensioners/family pensioners.
(ii) Rates of Constant Attendant Allowance to be increased by five times to Rs. 3000 p.m.
(iii) Pension to be paid at $50 \%$ of the average emoluments/last pay drawn (whichever is more beneficial)
without linking it to 33 years of qualifying service for grant of full pension.
(iv) A liberal severance package for employees leaving service between 15 to 20 years of service.
(v) Higher rates of pension for retirees and family pensioners on attaining the age of $80,85,90,95$ and 100 years.
(vi) Revision of the commutation table suggested for commutation of pension.
(vii) Framing of an appropriate insurance scheme suggested for meeting the OPD needs of pensioners in non-CGHS area.

## 11. Advances

A new mechanism for grant of advances under which an employee will take the advance from an approved bank and the Government will give an interest subsidy equal to two percentage points on the rate of interest being charged by the bank to the employee. Existing limits of various advances increased and provisions made for their automatic revision periodically.

## 12. Women employees

Benefits like staggered working hours, special leave for child care, enhanced maternity leave of 180 days, better accommodation facilities in the form of working women's hostels, etc. specifically for women employees.

## 13. Persons with disabilities

For Government employees with disabilities recommended various benefits like enhanced number of casual leave, special aids and appliances for facilitating office work, higher interest subsidy for automobile loans, liberal flexi hours, higher rate of transport allowance, better prosthetic aids and proper grievance redressal machinery. Extra allowance for disabled women employees to take care of young child till the time child attains the age of two years.

## 14. Rationalization of the existing process

(i) Steps leading to improvement in the existing delivery mechanisms by more delegation, delayering and an emphasis to achieve quantifiable and concrete and results.
(ii) Greater emphasis on field offices/organization at the cutting edge of delivery. Parity between posts in field offices and the secretariat.
(iii) Enhanced pay scales for Nurses, Teachers and Constabulary with whom the common citizen has most frequent interaction. Postmen have also been upgraded.
(iv) Delayering of administrative offices to cut down hierarchical levels.
(v) Emphasis on training academies and training processes within the Government.

The scales of pay for different categories of employees on the basis of recommendation of the $6^{\text {th }}$ Pay Commission were introduced by the Central Govt. through Central Civil Services (Revision of Pay) Rules,

2008 published on 29.08.2008. We are reproducing below revised scales upto the scale corresponding to the unrevised scale, Rs.12000-375-18000/-, as we are concerned upto that level.
(In Rs.)

| Present Scale |  | Revised Pay Structure |  |  |  |

## CHAPTER 5

## RECOMMENDATIONS OF THE FIFTH PAY COMMISSION AND DECISION OF THE STATE GOVERNMENT THEREON

5.1 As per clause 2(i) of the Resolution No. 8349 dated 10.11.2008 while making recommendation, the Pay Committee is required to keep in view the recommendation of the Fifth State Pay Commission and the decision of the Govt. taken thereon. In this chapter we would discuss the relevant recommendation of the $5{ }^{\text {th }}$ Pay Commission and decision taken by the Govt. on the basis of those recommendations.
5.2 The Fifth State Pay Commission did not agree with the suggestion of the Sixth Pay Commission for abolition of Group ' $D$ ' posts and has recommended a scheme of pay structure including the posts of Group 'D' employees.
5.3 In the course of its deliberations, the Fifth Pay Commission has remarked as follows:-
"Most of the Associations have demanded introduction of a revised pay structure consisting of pay bands and grade pays in the same pattern while the Govt. of India has introduced for its employees with effect from 01.01.2006 (following the recommendations of the Sixth Central Pay Commission). But none of them has given any reason as to why this system is preferable. Some of the Associations have also suggested scale to scale revision. Again, none of the latter, who mainly
represented the lower scale employees, have recorded their objection to the concept of pay bands. Very few of them have however, stated in course of hearings that they apprehend that, clubbing of a number of scales in a single pay band may ultimately be harmful to the interest of the holders of the lower scales clubbed with the higher scales."

The Commission recommended five running pay bands - one each for all the posts belonging to Group ' D ', Group ' C ', Group ' B ' and two running pay bands for the posts belonging to Group ' A ' posts. It is pertinent to mention here the pattern of groupings of scales in Govt. Sectors. As per existing clarification, the posts borne in Scale No. 1 or Scale No. 2 fall within Group 'D', those borne in any of the scales No.3, to No. 7 fall within Group ' C ', those borne in any of the scales bearing 8 to 11 fall within Group ' B ' and those which are borne in higher pay scales beginning with Scale No. 12 fall under Group 'A'. The Pay Bands recommended by the Pay Commission are as follows:-

| Existing Scale Nos. | Running Pay <br> Band No. | Pay Band |
| :---: | :---: | :---: |
| 1 and 2 | 1 | Rs.4900-16,200/- |
| 3 to 7 | 2 | Rs.5400-25,200/- |
| 8 to 11 | 3 | Rs. $7100-37,600 /-$ |
| 12 to 18,22 and 24 | 4 | Rs. $9000-40,500 /-$ |
| 19 to 21 and 23 | 5 | Rs.37400-60,000/- |

5.5

For the entry level posts of different State services borne in the Scale of Rs.8000-275-13,500/-, the Commission recommended a higher initial Band Pay of Rs.15,600/- in the Pay Band No. 4 i.e. Rs.9000-40,500/for some other cadres also the Commission recommended higher initial Band Pay in their respective Pay Bands.
5.6 Following the principle of Sixth Pay Commission, Fifth State Pay Commission also determined the quantum of Grade Pay. Broadly by application of the method of fixing $40 \%$ of the maximum of the scales in which the posts are borne, 24 different Grade Pays starting from Rs.1700/to Rs.9500/- were recommended. For the posts which had higher initials in the unrevised scale which were, however, calculated different.

Pay Band and Grade Pay recommended by the Pay Commission are as follows:-

| Pay Band and Grade Pay recommended against pay scales |  |  |  |  |
| :---: | :---: | :---: | :---: | :---: |

| 24. | 12500-375-18500 | PB-4 | Rs.9000-40500 | Rs. 8000 |

5.7.1 In respect of fixation of pay of the employees in the revised pay the Pay Commission recommended that an amount equivalent to $86 \%$ of basic pay be notionally merged with the basic pay to arrive at the notional band pay on 1.1.2006. In other words a multiplication factor 1.86 is to be used to arrive at the Band Pay.
5.7.2 The recommendation of the Commission regarding fixation of pay are as follows:

A Government employee may be allowed option to continue to draw pay in the existing scale until the date on which he earns his next or any subsequent increment in the existing scale or until he vacates his post or ceases to draw pay in that scale.

Provided that in cases where a Government employee is placed in a higher pay scale between 01.01.2006 and the date on which the Revised Pay Rules is notified, on account of promotion, upgradation of pay scale, etc. the Government employees may be allowed to elect to switch over to the revised pay structure from the date of such promotion, upgradation etc.
(i) The pay of a State Government employees who continued in the service after 31.12.2005 may be determined subject to his option notionally as on 01.01.2006 by multiplying his existing Basic Pay by a factor of 1.86 and rounding off the resultant figure to the next multiple of 10 .
(ii) If the minimum of the revised pay band is more than the amount arrived at as per (i) above, the Band Pay shall be fixed at the minimum of the revised pay band.
(iii) In addition to the pay in the Pay Band, as determined under (ii) above, Grade Pay corresponding to the existing scale will be payable. Commission recommended that the increment will be $3 \%$ of the sum of the pay in the Pay Band and Grade Pay applicable. The sum will be then rounded off to the next multiple of 10 . The amount of increment will be added to the existing band pay.
5.9 Commission's recommendation on fixation of pay on promotion is quoted below:

Fixation of pay on promotion on or after the $1^{\text {st }}$ January, 2006. - In the case of, promotion from one grade pay to another in the revised pay structure, the fixation will be done as follows:-
(i) One increment equal to $3 \%$ of the sum of the pay in the pay band and the existing grade pay will be computed and rounded off to the next multiple of 10 . This will be added to the existing pay in the pay band. The grade pay corresponding to the promotion post will thereafter be granted in addition to this pay in the pay band. In cases where promotion involves change in the pay band also, the same methodology will be followed. However, if the pay in the pay band after adding the increment is less than the minimum of the higher pay band to which promotion is taking place, pay in the pay band will be stepped to such minimum.
(ii) In the cases of non-functional movement to higher scales, the same increase in the form of one increment in the same running pay band will be admissible, but there will be no change in the Grade Pay.
5.10 In respect of Allowances recommendation of Pay Commission are as follows:

Dearness Allowance: The principle followed by Government of India in the matter of calculation of quantum of each instalment of Dearness Allowance be followed and Dearness be paid in line will central pattern of sanctioning two instalments of D.A. in each year.
H.R.A.: $\quad 15 \%$ of the revised basic pay (sum of the Band Pay and Grade Pay) subject to ceiling of Rs.6000/- per month.

Medical Allowance: In case of Government employees or pensioners who would not opt for West Bengal Health Scheme, 2008, the existing rate of medical allowance be raised Rs.300/- per month.
5.11 Date of effect: The Pay Commission proposed that the benefits of revised scales i.e. the Pay Band and Grade Pay and the D.A. may be given notional effect from 01.01.2006 and actual effect of this benefit be given from 01.04.2008. The H.R.A. and M.A. at revised rate suggested by it may be given prospectively with effect from 01.04.2009. Commission also recommended that the revised pension and family pension be given notional effect from 01.01.2006 and actual effect from 01.04.2008.
5.12 The Commission further suggested that the arrears of pay, D.A. etc. may be paid in three equal instalments consecutively commencing preferably from the year, 2009-10.
5.13 The State Government accepted the pay scales (Band and Grade Pay etc) as proposed by the Commission and described in para X-5 and other recommendation described in paras 6-11 and issued Govt. Notifications in this regard on 23.2.2009.

## CHAPTER 6

## ECONOMIC CONDITION OF THE COUNTRY, FINANCIAL RESPONSIBILITY OF THE GOVERNMENT OF INDIA AND THE PATTERN OF ALLOCATION OF REVENUES TO THE STATE

6.1 This Committee is required to take note of the "the economic condition of the country, financial responsibility of the Government of India and the pattern of allocation of revenues to the State" before making recommendations on the matters mentioned in the Govt. Resolution No. 8349-F dated 10.11.2008.
6.2 A close look at the overall economic condition of the country reveals that from 2006-2007 to the first half of 2008-2009 there has been high economic growth phase for India. Growth in GDP projected to be more than $8 \%$ is based on projected growth in manufacturing and service sector. Agriculture sector has been steadily declining in terms of its contribution to GDP.
6.3 High growth projections have been equally matched by capital formation, investment and high growth in domestic savings mostly from the Private Sector.
6.4 Optimism in domestic economy was matched by growing export, falling current account deficit until 2006-2007 and rising foreign exchange reserve.
6.5 However, proportional rise in import had been pushing up the trade deficit by 2006-2007. Simultaneously appreciating value of rupee had adverse effect on export which was rising until 2006-2007. Despite growth in manufacturing and service sector inflationary trend in the Indian economy resulted from increase in price of agricultural products/primary articles and international oil price hike.
6.6 All round optimism except in import export front was complemented by declining fiscal deficit. This had complementary good performance in asset creation by borrowed fund which indeed help in repayment of debt.
6.7 Apparent high growth scenario of the Indian economy needs to be judged by several other indicators. Declining agricultural growth and artificially managed inflationary situation are precursors of many economic adverse effects. Volatile external economic activity also has long term adverse impact on the economy. Though it needs mention that Indian economy with low openness index is less vulnerable to external shocks, yet its vital imports like oil jeopardizes the economy. Secondly, with more opening up of the financial market over past few years vulnerability increased and the impact has been felt in the last few months' global financial crisis. Despite all these, Indian economy is relatively stable due to huge domestic market potential.
6.8 While global economy is gradually showing recovery, though slowly, Indian economy can expect better recovery if agriculture sector does not face a major disaster. Centre or at the State will not show any disastrous downturn or slump.
6.10 As to the pattern of allocation of revenues to the State the Pay Committee has noted the recommendations of the $12^{\text {th }}$ Central Finance Commission wherein it has been stated that the "overall transfers to the States, in relation to the Central Gross Revenue Receipts, should be fixed at $38 \%$ ".
6.11 "The $12^{\text {th }}$ Central Finance Commission also quantified, in absolute amounts, what each State was to receive during 2005-6 to 200910, by way of its share in Central taxes and duties, as also by way of various grants under the area of recommendation of the Finance Commission, lining up al such devolutions with the quantum of non-plan revenue deficit for each State as calculated by the $12^{\text {th }}$ Central Finance Commission itself".
6.12 The Pay Committee agrees with the observation of the $5^{\text {th }}$ State Pay Commission that there is difference between what had been recommended and "what eventually did devolve to the State".

## CHAPTER 7

# RESOURCES OF THE STATE GOVERNMENT, THE STATE-AIDED UNIVERSITIES, WEST BENGAL COUNCIL OF HIGHER SECONDARY EDUCATION AND WEST BENGAL BOARD OF SECONDARY EDUCATION AND THE DEMANDS THEREON ON ACCOUNT OF THEIR COMMITMENT TO ACTIVITIES RELATING TO DEVELOPMENT 

7.1 At this point this Committee is required to take a look at the resources available to the State Government as well as to the State-aided Universities, West Bengal Council of Higher Secondary Education and the West Bengal Board of Secondary Education as also at the demands on such resources on account of their commitment to developmental activities.
7.2 It is evident from the above table that with some minor fluctuations the growth of Gross State Domestic Product (GSDP) happens to be a steady one.
7.3 Now, if we consider the extent by which revenue deficit is related to revenue receipt it will be seen that revenue deficit is gradually decreasing.
7.4

It is to be noted in this respect that overhauling of the revenue sources, taking out of perverse subsidy, needs to dominate any policy reform agenda.

GSDP of West Bengal (at current price)

| Year <br> (1) | Quantity <br> (2) | Rate of growth (Rs. in Crore) <br> (3) |
| :---: | :---: | :---: |
| 1997-1998 | 97966 | - |
| 1998-1999 | 115516 | 17.91 |
| 1999-2000 | 135182 | 17.02 |
| 2000-2001 | 143536 | 6.18 |
| 2001-2002 | 157141 | 9.48 |
| 2002-2003 | 168045 | 6.94 |
| 2003-2004 | 189087 | 12.52 |
| 2004-2005 | 208613 | 10.33 |
| 2005-2006 | 234737 | 12.52 |
| 2006-2007 | 272597 | 16.13 |
| 2007-2008 | 309357 | 13.49 |
| 2008-2009 | 355761 | 15.00 |
| 2009-2010 | 409125 | 15.00 |
| 2010-2011 | 470493 | 15.00 |
| 2011-2012 | 541067 | 15.00 |
| 2012-2013 | 622227 | 15.00 |
| 2013-2014 | 715562 | 15.00 |
| 2014-2015 | 822896 | 15.00 |

7.5 Now one may look at the comments of the $5^{\text {th }}$ State Pay Commission that there is a tendency for salaries and pensions combined together to give sudden jumps at times, while registering low growths at other times.
7.6 This Pay Committee agrees with the opinion of the $5^{\text {th }}$ State Pay Commission that the overall resource position of the State will
continue to be difficult in the near future unless the $13^{\text {th }}$ Central Finance Commission gives due weightage to some of the pleas made by West Bengal.
7.7 It is pertinent to note that the State wants an enhancement of the proportion of the State's share of Central Taxes to $50 \%$ along with some revenue deficit grants and the package of debt relief. The State pleas further for bearing by the Central Government at least $50 \%$ of the additional burden to be put on the State Government's exchequer till 201011 on account of pay revision in the State, consequent upon the Centre's decision on the recommendations of the $6{ }^{\text {th }}$ Pay Commission.
7.8 The $12^{\text {th }}$ Central Finance Commission has observed that the "Vertical imbalance arises since resources have been assigned more to the Central Government and States have been entrusted with larger responsibilities". That is why the Constitution has specific provisions for transfer of revenues from the Centre to the States in different forms- in the form of tax devolution and in the shape of grants.
7.9 At the same time it needs mention that revenue generation can only be increased by making the tax base broader. It is not the rate but the base needs to be expanded. Perverse subsidies have to be identified and taken out and replaced by revisited subsidy schemes.
7.10 Especially for the Higher Education Sector existing subsidy needs to be revisited in the state-aided universities and other organizations that fall within the purview of this Committee. Hardly any rigorous
research has gone into the policy discourse to show that it is the rich who get subsidized. So fee revision at state-aided universities with scope for Scholarship for poor students can generate some revenue for higher education. However, the higher education system and financial policies need public debate to strengthen the universities financially. Until such reform is in place the only way to sustain the higher education system with good faculty and staff will be handholding role of the Government. It we consider the current situation of the universities' financing mechanism without fund flow from the Government, quality cannot be maintained as it will not be able to stop the brain drain be it at the faculty level or student level. Along with Government finance, students' fees and endowments, corporate finance sources are also required to be explored to strengthen the higher education system in India and the States. The universities and such other bodies may generate funds through consultancy, testing, bookselling, and through interaction with industry as well. But that fund is not sufficient enough to meet the major requirements of the universities such as staff salary, major research in the emerging areas etc. Moreover, it is not sustainable. The university concerned may make a plan of its own as to utilization of this fund keeping in view its uniqueness of vision.

## CHAPTER 8

## ACADEMIC ADMINISTRATION: THE PAY COMMITTEE'S APPROACH

8.1 A question is often raised regarding the necessity of constituting a separate Pay Committee for the non-teaching employees of the universities. Some are of the opinion that the construction of the paystructure for the university employees could be done by the State Pay Commission itself and some believe that it is simply an application of a 'copy and paste' device in line with the pay structure of the State Government. But a close study of the job descriptions of different kinds of non-teaching employees under the university system highlights the differences between the nature of functioning of the university employees and that of the employees working in the government sector or in such other bodies including corporate houses in spite of the fact that there are similarities as well. If one can understand the nature of the similarities, then alone one can appreciate the differences.
8.2 The objective of a university is creation, extension and dissemination of knowledge. And so, besides teaching and research a university needs to develop a system of intimate interaction with the society. Keeping in view these three dimensions - teaching, research, and outreach - a university demands an administration with a difference, an academic administration, which is marked by its organic growth and not by mechanical expansion. It is a kind of administration that acts as a catalyst in facilitating all academic programmes undertaken by the universities, which will cater to the interests of the students, parents, government,
faculty, employees and society at large. The demand of the market also cannot be ignored.
8.3 Time is changing. It never ran so fast as today. We like it or not, competition has become the key word in life. The academic arena is also in the face of a challenge. Foreign and private universities have come on the scene. They are ready to provide sophisticated infrastructure and strong financial backing. May be they have certain ulterior motif for making profit, but there is no doubt that their presence has posed a challenge to the management of higher education in the country. To combat this situation the state-aided universities are required to have an administration with trained workforce, updated with knowledge and tuned with vision. The Committee has noted with appreciation that with this end in view the University Grants Commission, an apex body of higher education in the country has extended its assistance in establishing Administrative Staff Training Centres in different universities of the state. At the same time the Pay Committee believes that each university has a rhythm of its own and this uniqueness should be taken into consideration while dealing with the functioning and management of the universities. Hence we sent the following questionnaire to all the vice-chancellors of the state-aided universities that fall under the purview of this Pay Committee.

## Questionnaire

a) A question is often asked as to whether the disparity between the pay scales of university employees and the Government employees should continue or not. If the disparity is consonant with job
responsibilities under the university system, what measures are to be considered appropriate to lend visibility to the implied differences?
b) The two-fold task of the universities, namely, creation of knowledge and creation of trained workforce, makes all the difference between the universities and other institutions, organization or establishment. What measures are to be adopted to ensure that the difference is reflected in the job responsibilities assigned (or proposed to be assigned) to the university employees?
c) What measures are to be adopted to ensure that a highly motivated and well-organised workforce at the non-teaching level is in place and is instrumental in facilitating the projection of the university at the international arena and its elevation to higher rank?
d) What strategy needs to be adopted by the universities to link the non-teaching employees meaningfully to the research support systems against the backdrop of strengthening such systems on a continuing basis?
e) What strategy needs to be adopted by the universities to raise the level of quality-consciousness among the non-teaching employees, considering the fact that concern for quality among the employees at all levels is important for quality-building in the universities?
f) What measures are to be adopted to link the job responsibilities of the non-teaching employees to the institutional quality improvement initiative of the universities?
g) What measures are to be adopted to ensure that the job responsibilities of the non-teaching employees are consonant with university vision and strategic plan?
h) What measures are being contemplated for improvement of library service in your University and for deployment of library personnel towards this end with a view to meeting all the needs of your research programmes in the coming years and facilitating involvement in competitive research?
i) What measures are being contemplated to mobilize resources in your University as the means to supplement Government funding?
j) To what extent will a Service Commission constituted in the pattern of SSC/CSC for dealing with all cases of recruitment and promotion of non-teaching staff of all the State-aided universities be able to ensure quality and transparency?
k) What other criteria besides merit and seniority need to be taken into account while considering the suitability of non-teaching employees for promotion to higher posts? Should there be a standard format for maintaining the performance record of the employees?

1) To what extent will a set of uniform service rules for the nonteaching employees of all the universities be able to improve the functioning of the universities?
m) What constraints a university to depart occasionally from the normal practice of obtaining necessary approval before incurring expenditure out of Government grant? What is the record of your University in this regard?
n) Is it possible to interpret the existing G.O.s in such a manner as to enable the university authority to promote non-teaching employees to posts that have not been created in terms of such G.O.s? What is the record of your University in this regard?
o) What measures may be adopted to create a fund out of university's own income that may be put to use for maintaining posts for which Government sanction may not be forthcoming?
p) How can it be ascertained that the staff strength of a University is proportionate to its development initiatives in the coming decades?
q) How should the universities address the issue of uneven distribution of workload among the non-teaching employees before it starts impairing the functioning of the universities?
r) Why are the universities constrained to recruit casual staff, notwithstanding the modalities and consequent problems? What is the experience of your University in this regard?
s) Has the rationalized nomenclature as envisaged in G.O. No.2426(b)-Edn(u) dated 17.10 .85 been adopted in your University?
t) Considering the development initiatives that have to be adopted by the universities in the coming years, could you suggest any change in the nomenclature of the non-teaching employees of the universities so as to make it consonant with recruitment qualifications, job responsibilities and hierarchical position?
u) To what extent would it be possible to follow a uniform pattern for upward movement in the service career through promotion, CAS, or a combination of the two, keeping in view the fact that every upward movement implies a rise in the level of job responsibilities?
v) Would it be advisable to grant incremental benefits at the time of promotion even though the concerned employee has already been accorded such benefit at the time of movement in the same scale in terms of the CAS?
w) Would it be advisable to follow the structure of 'Pay Band' and 'Grade Pay' as introduced by the State Government?
8.4 It is unfortunate to note that majority of the vice-chancellors did not send us their replies to the questionnaire. The Pay Committee has planned to visit the universities after the first part of the recommendations is submitted to the State Government and to meet them separately, as their
opinion is of vital importance in formulating promotion policies, job descriptions and other related guidelines in respect of the non-teaching staff of the universities. Regarding anomalies and irregularities their considered opinion will help the Pay Committee take a rational decision.
8.5 The Pay Committee is required to consider the pay structures, promotion policies etc. in respect of the employees of the West Bengal Council of Higher Secondary Education, the West Bengal Board of Secondary Education and West Bengal State Council of Rabindra Open Schooling as well. It is presumed that keeping in view that secondary education is the gateway to higher education the employees working under these organizations have been brought within the ambit of this Pay Committee.
8.6 The Pay Committee is of the opinion that characteristically there is no similarity between the functioning of the universities and the functioning of these organizations.
8.7 It transpires from the memoranda submitted by different organizations, groups and the individuals and subsequent hearings on the same that in most of the cases the university authorities have taken decisions without consulting the State Government regarding pay scales, promotion policies, entry qualifications etc, as a result of which different types of anomalies have cropped up. The Committee strongly believes that to prevent occurrence of such practices a separate Commission like CSC/SSC needs to be created, which will deal with all matters relating to Recruitment, Promotion, CAS, etc. so that transparency is ensured and irregularities and anomalies are removed. The university administration
may devote more time in facilitating academic programmes. The said Commission is also required to ensure observance of Reservation norms. This matter however will be dealt with separately in the next part of the recommendations.
8.8 The State Government provides funds to the universities under different heads including salary with some stipulations and/or guidelines. Since the funding is made from public exchequer transparency needs to be ensured in all respects. The Committee observes with concern that in the name of autonomy different universities often violate Government Orders in different ways, thus creating anomalies that lead to discontent amongst the employees. Flexibility is no doubt an essential precondition for good governance in the academic institutions in general and in the universities in particular, but of course not at the cost of accountability. At the same time the question of accountability should be viewed holistically as it involves the teachers, the students, the researchers, the officers and the non-teaching staff.
8.9

It is true that an academic administration needs to be viewed in a different way but at the same time it is felt that a balance between accountability and flexibility, between autonomy and discipline has to be ensured by such administration while facilitating academic programmes.
8.10 The Committee has noted that the universities and such other organizations are funded mainly by the State Government involving public exchequer. Any departure from the financial and /or administrative norms will create chaos in the system and the objective of the universities will be affected and, as a result, the society will suffer.

It is also felt that different Acts, Rules, Government Orders etc. need to be followed by all the universities/organizations in the same manner. In case of any confusion communications with the State Government may be made for necessary clarifications.
8.12 The Pay Committee deems it necessary that the higher education department in the State Government brings out every year a compendium of all Government Orders issued from time to time relating to the universities. Or else the university authorities will have to depend on files which are seldom kept updated, resulting in serious mistakes occurring now and then. The Pay Committee had to collect such Orders from various sources painstakingly which is not desirable at all.
8.13 It is noted that some of the universities are not under the administrative control of the higher education department of the State Government. The Committee thinks that all the state-aided universities should be brought under one umbrella, that is, the higher education department and the university branch of that department needs to be strengthened with effective workforce who will keep track with the universities so that observance of Government Orders etc is ensured. It is felt that if the government nominees on different committees of the universities had acted effectively a good number of anomalies and irregularities could have been avoided.
8.14 The Pay Committee is of the opinion that since an academic administration is an administration with a difference there may be some differences in some cases between the pay-structure of the State

Government and that of the universities in respect of the non-teaching employees. While constructing the pay structure the Committee has taken every care to assure that the extent of the differences, if any, is based on rational and logical approach.
8.15 The Pay Committee does not make the present recommendations taking into account the conditions prevailing at present alone, but visualises the quality developments in the field of higher education that will take place in the next ten years.

## CHAPTER 9

## EXISTING PAY STRUCTURE OF THE NONTEACHING EMPLOYEES OF THE STATE-AIDED UNIVERSITIES AND EMPLOYEES OF WEST BENGAL COUNCIL OF HIGHER SECONDARY EDUCATION AND WEST BENGAL BOARD OF SECONDARY EDUCATION

9.1 In terms of resolution No.8349-F dated 10.11.2008 the Pay Committee is to examine the existing pay structures of the employees whose revision of pay structures are subject matter of consideration of the Committee. So before initiating our deliberations on the pay structures we are proposing to recommend the salient features of the existing pay structure are discussed in following paragraphs. Organizational structures of the universities vastly differ from those in the Council of Higher Secondary Education and Board of Secondary Education. In respect of the universities pay scales of non-teaching employees and in respect of other two organizations, all employees are under terms of reference of this

Committee. So we are concerned with two sets of employees. These two sets of employees are being dealt with separately.
9.2 The salient features of the pay structures of the non-teaching employees of the universities were introduced as per ROPA Rules, 1999 in terms of Education Department Notification No. 811 (9)-Edu(U) dated 08.09.99 are summarized below :-
i) The existing pay structure came into effect on and from 1.1.1996. The number of scales were-9. In the earlier revision also it was 9 .
ii) The minimum pay was Rs.2850/- which was higher than pre-2006 minimum pay under the State Govt. by Rs.250/-
iii) At some levels, the scales of pay of some posts such as Peon, Jr. Assistant, Senior Assistant etc. are higher than similarly placed officials in the State Govt. Sectors, Central Govt. or Central Universities. In respect of posts like Sub-Assistant Engineer, Technical Assistants and Librarian i.e. which are technical or professional cadres, the pay scales are lower than similarly placed or comparable cadres in the State Govt. or other organizations.
iv) The pay structures now being obtained in the Stateaided universities are generally on the lines of the scale of the State Govt. but in some cases there are distinct differences in some aspects. The Scale no. 1 starts with Rs.2850/- in respect of university employees meant for the Peons at the entrant level is almost similar to Scale no. 3 of the State Govt. pay structure. In the State Govt. pay structure this scale is the initial pay scale of Group-‘C' category. Scales $3,4,5,6,7$ and 8 are similar or
almost similar to scales of $8,7,10,11$ and 12 of the State Govt. scales. The scale No. 9 is structurally similar to Scale no.14.
v) The span of the scales is generally long ranging from 24 years to 29 years - in Scale no. 1 it is 24 years, in Scale no.6, 29 years and in all other scales it is 28 years.
vi) The rates of increments vary from Rs.60/- to Rs.275/-. The gaps between initials of the two consecutive scales are within the range of Rs.150/- to Rs.400/-. The gaps however do not follow any regular pattern. The gap between the initials of scales 6 and 7 is Rs.400/- whereas the gap between the initials of scale 7 and 8 is only 200.
9.3 The salient features of the pay scales of the Council and Board are that upto Scale no. 9 the scales are identical with the scale obtained in the State-aided universities and the scales beyond that are identical with the scales prevailing for the employees of the State Govt. employees. The pay structure of Assistant Secretaries and Deputy Secretaries of these two organizations are identical with unrevised pay structure of Assistant Secretary and Deputy Secretary in the State Secretariat. The rate of increments in Scales no. 10 to 13 varies from Rs.225/- at lowest to Rs.375/at the highest. The gaps between initials of the two successive scales are Rs.2000/-.
9.4 The distribution employees in different scales/graded are given the following chart.

| $\begin{gathered} \text { Scale } \\ \text { No. } \end{gathered}$ | Scale of Pay | No. of sanctioned posts | No. of filled up posts | Name of the Posts |
| :---: | :---: | :---: | :---: | :---: |

N.B.

1. Prepared on the basis of reports received from the universities,

Council, and Board.
2. Nomenclature of posts are as per aforesaid reports and not as per rationalized nomenclature enunciated in G.O. No. 2426-Edn(U) dated 17.10.1985.

## CHAPTER 10

## CONSTRUCTION OF PAY STRUCTURE

### 10.1 Preliminary considerations

10.1.1 The process of rationalisation of pay structure of non-teaching employees of State-aided universities was initiated with the issue of G.O. No.711(6)Edn(U) dated 24.4.1979 whereby a set of nine pay scales was introduced by the Government and made uniformly applicable to all the universities, replacing a multitude of pay scales that was prevailing in the universities at that time. The scales of pay as sanctioned by the Government in 1979 were revised twice in subsequent years, the first time in terms of G.O. No.1083(8)-Edn(U) dated 18.8.1990, and the second time in terms of G.O.342-Edn(U) dated 3.5.1999. For convenience of description, these three schemes will henceforth be referred to as the ROPA-1979, ROPA-1989, and ROPA1999 schemes respectively.
10.1.2 The figures representing the initial basic pay for the nine scales prescribed under the ROPA-1979 scheme belonged to an ordered sequence given by

$$
\mathrm{A}_{\mathrm{n}}=\mathrm{A}_{1}+(\mathrm{n}-1) \mathrm{B}
$$

where $A_{1}=300$, and $B=25$. No pay scales were, however, defined for $\mathrm{n}=$ 6,8,10 and 12 .
10.1.3 The corresponding figures for the ROPA-1989 scheme are related in some way to the figures in the ROPA-1979 scheme through a transformation formula which forms a part of the latter scheme. By transformation formula we mean a mathematical device by which a new set of numbers can be derived from an older set. A departure from an ordered sequence creeps into the scheme with the introduction of revised pay scales independently of the transformation formula. The third column of Table 1 given the figures obtained from the second column through the application of the transformation formula accompanying ROPA-1989 scheme. If the definition of the revised pay scale had been solely dependent on the transformation formula, the figures in column 3 would have been fitted to a number system as shown in column 4 which can be described once again as

$$
\mathrm{A}_{\mathrm{n}}=\mathrm{A}_{1}+(\mathrm{n}-1) \mathrm{B}
$$

B in this case being equal to 50 and $\mathrm{A}=1000$. The figures in column 5 depicting the initial basic pay of the different scales of ROPA-1989 scheme agree in a certain way to the number system of column 4 in case of scale nos. $5,6,7$, and 8 , but differ widely in case of others.
10.1.4 ROPA-1999 scheme once again calls for replacement of the set of numbers of the ROPA-1989 scheme by a newer set through the application of a new transformation formula.

If the development of the revised scheme had been primarily dependent on the use of the formula, the set of numbers given in column 7 would have been obtained from column 4, and fitted to the set given in column 8 , which once again belongs to an ordered sequence given by

$$
\mathrm{A}_{\mathrm{n}}=\mathrm{A}_{1}+(\mathrm{n}-1) \mathrm{B}
$$

$A_{1}$ being equal to 3100 and $B=150$

Actual values of initial basic pay for different scales of the ROPA1999 scheme are given in column 9 of Table 1 . The amount by which the actual value (col. 9) exceeds the value obtained on the basis of the assumption that the transformation formula was the prime consideration for construction of pay scales at every stage (col. 8) is shown in column 10.

Figures in column 10 indicate that the actual value falls short of the theoretically calculated value by a substantial amount for scales 1 to 4 , while for others the picture is just the reverse.
10.1.5 A different picture emerges when the figures obtained through the application of transformation formula to the actual values of basic pay for different scales in the ROPA-1989 scheme as shown in column 5 are entered in column 11 and compared with the corresponding figures for the ROPA-1999 scheme as given in column 9. Column 12 indicates that the actual value exceeds the theoretical value for all the scales.
10.1.6 The factors that have been taken into consideration while departing from a rationalized scheme are not so apparent from the shape of
the scales themselves. The $6{ }^{\text {th }}$ Central Pay Commission and the $5^{\text {th }}$ State Pay Commission have made the transformation formula the basis for definition of their revised schemes. A welcome departure has then been made from the earlier practice of defining the pay scales independently of the formula.
10.1.7 Application of the transformation formula implies the existence of a pre-existing system for which the formula is relevant. A question may be asked as to whether the figures in column 8 should be taken to represent the ROPA-1999 scheme, since these figures belong to an ordered sequence which has been derived from the original ordered sequence of ROPA-1979 scheme through successive application of transformation formula associated with ROPA-1989 and ROPA-1999 schemes, figures in column 10 speak eloquently against such a step.
10.1.8 The number system in column 10 representing the ROPA1999 scheme is a disordered sequence. Considering the numerical values of the difference between the actual figures in the system and theoretical values calculated from the actual figures of ROPA-1989 scheme as given in column 12, one, may be justified in observing that the system in column 10 deserves a fair trial, despite the range of variation in such values and despite lack of knowledge about the basis of derivation of the system. The transformation formula for the ROPA-2009 scheme would, thus be relevant for the number system of column 9 .

### 10.2 Transformation formula

10.2.1 For the range of pay scales being dealt with by the present Pay Committee, revision of pay consists in substitution of one set of scales by another by means of application of a simple transformation formula.
10.2.2 Construction of pay scales follows a more or less well-defined pattern as exemplified by the pay revision exercise of 1999. The following elements of pay and allowances determine the magnitude of the multiplication factor that acts as an element of the transformation formula used in the conversion of the revised scales of the ROPA -1989 scheme to the revised scales of the ROPA-1999 scheme.

| Basic pay on 31.12 .95 | $\ldots$ | 100 |
| :--- | :--- | :--- | ---: |
| Dearness allowance @ $148 \%$ of basic pay | $\ldots$ | 148 |
| Second interim relief @ $10 \%$ of basic pay | $\ldots$ | 10 |
| Booster @ $40 \%$ basic pay $\ldots$ | $\ldots$ | $\underline{40}$ |

Total 298

The second component of the transformation formula is a lump sum amount (Rs.100) to be added as the first interim relief to the product of the basic pay and the multiplication factor (2.98).
10.2.3 Both the $6^{\text {th }}$ Central Pay Commission and the $5^{\text {th }}$ State Pay Commission have devised a transformation formula in a similar manner in their current pay revision exercises. One component of the formula is a multiplication factor derived from the elements of existing pay and allowances.

Basic pay on 31.12.2005 ... ... 100
Dearness pay @ $50 \%$ of basic pay ... 50
Dearness allowance @ 24\% of
(Basic pay + Dearness pay) ... 36
Total 186
10.2.4 The omission of the booster element as a component of the multiplication factor is a notable departure from the earlier pay revision scheme.

The second element of the transformation formula is a lump sum amount that has to be added to the product of the basic pay of the existing scale and the multiplication factor (1.86). This element seems to bear some resemblance to the booster element of the earlier pay revision scheme insofar as the corresponding figure is worked out as 40 percent of the basic pay at the end of the respective scale in the existing scheme. The name Grade Pay has been assigned to this element of the transformation formula by the $6^{\text {th }}$ Central Pay Commission and the $5^{\text {th }}$ Pay Commission.
10.2.5 Assuming that there are $m$ annual stages for each of the $n$ pay scales in the pre-revised scheme, one will have $\mathrm{n} \times \mathrm{m}$ numbers to deal with, each representing the basic pay for a given stage in a given scale. Application of the transformation formula replaces the set of $\mathrm{n} \times \mathrm{m}$ numbers in the pre-revised scheme by a new set in which each member defines the initial basic pay in the revised scales corresponding to the $\mathrm{n} \times \mathrm{m}$ stages in the pre-revised scheme. The pay structure has, however, to be so defined as to provide information on the annual progression in basic pay for all the n x m cases in the revised scale where the initial basic pay is given. Accordingly, the family of numbers in the revised scheme includes $\mathrm{n} \times(\mathrm{m}-1)$ additional members which describe the annual progression corresponding to each of the $\mathrm{n} \times \mathrm{m}$ numbers representing the initial basic pay in the revised scale.
10.2.6 The problem of handling $\mathrm{n} \mathrm{x} \mathrm{m}^{2}$ numbers has so far been addressed in two diametrically different ways. The standard practice has been to adopt a process of
replacement of the $\mathrm{n} \times \mathrm{m}$ numbers by a new set of $\mathrm{n} \times \mathrm{m}$ numbers independently of the transformation formula while defining the initial basic pay, incremental slabs, and the successive stages of the n pay scales. The transformation formula is used subsequently to describe the transition from the pre-revised to the revised scheme. This procedure has its own limitations as will be described in a subsequent section. The $6{ }^{\text {th }}$ Central Pay Commission and the $5^{\text {th }}$ State Pay Commission have adopted a different approach. Application of the transformation formula has been the basis of replacement of $\mathrm{n} \times \mathrm{m}$ members of the pre-revised scheme by a new set of $n \times m$ members of the revised scheme. Each member of the new set represents the initial basic pay in the revised scheme corresponding to a particular stage in a given scale in the pre-revised scheme. The remaining $\mathrm{nx}(\mathrm{m}-1)$ members of the new set are obtained through the application of the 3 percent increment formula.
10.2.7 Both the $6^{\text {th }}$ Central Pay Commission and the $5^{\text {th }}$ State Pay Commission have invoked different values for the multiplication factor in the transformation formula for different groups of pay scales.
10.2.8 Whether there are factors other than those used in the calculation of the multiplication factor described above, maybe differentially for different groups of pay scales, has not been expressly stated in any official document. The rationale for adoption of different values for the multiplication factor across the scales is not so obvious. In the absence of any express statement, there is no way to judge whether any of such factors could have been relevant for the range of pay scales that is being dealt with by the present Pay Committee. The Pay Committee has been constrained to accept what according to it appears to have a rational basis.

### 10.3 Degree of nonuniformity in the rate of progression of basic pay

10.3.1 A significant feature of the existing pay scales and the earlier scales from which they have been derived during successive phases of pay revision is the variation in incremental rates from one scale of another as well as from one end to another within a given scale. Such variation resulted in markedly diverse rates of progression in basic pay across the pay scales as illustrated in the following Table (Table 2).

Table 2 Nonuniformity in the rate of progression of basic pay across the pay scales of ROPA - 1979, ROPA - 1989 and ROPA - 1999 schemes.

10.3.2 Under the existing system, a 100 percent increase over initial basic pay, for example, is achieved in 42 years for Scale nos.1, and 23 years for Scale nos. 8 and 9 . Such disparity could have been avoided if the system of providing annual increment at the rate of 3 percent of basic pay as lately proposed by the $6^{\text {th }}$ Central Pay Commission and $5^{\text {th }}$ State Pay Commission had been in place. The 3 percent increment formula removes the disparity in the rate of growth across the pay scales at just one stroke. The number of years needed to achieve 100 percent increase over the initial
basic pay during progression in the respective scales would have been the same for all scales had the formula been adopted earlier.
10.3.3 The 3 percent increment formula of the $6^{\text {th }}$ Central Pay Commission and $5^{\text {th }}$ State Pay Commission is a unique feature in their pay revision exercise. To realize the enormous potential of this formula we have adopted a scheme of rationalization by way of fitting all the figures representing the basic pay at successive stages of different scales of the existing system to a continuous number system in which each number exceeds the preceding one by 3 percent. Such fitment is brought about before the application of the transformation formula. The advantages inherent in this procedure will be apparent in the sequel.

### 10.4 Towards a rationalized pay structure

10.4.1 We consider a set of pre-revised pay scales $U_{1}, U_{2}$, $U_{3}, \ldots \ldots \ldots \ldots \ldots$, wherein the initial basic pay for the respective pay scales are given by a set of numbers $\mathrm{A}_{11}, \mathrm{~A}_{21}, \mathrm{~A}_{31}, \ldots \ldots \ldots \ldots \ldots$. which are related to one another by the following formula :

$$
\begin{aligned}
\mathrm{A}_{\mathrm{n}} & =\mathrm{A}_{\mathrm{n}-1} \cdot \mathrm{I} \\
& =\mathrm{A}_{1} \cdot \mathrm{I}^{\mathrm{n}-1}
\end{aligned}
$$

which means $\mathrm{A}_{11}=\mathrm{A} ; \mathrm{A}_{21}=\mathrm{A} . \mathrm{I} ; \quad \mathrm{A}_{31}=$ A. $^{2}, \ldots \ldots \ldots \ldots$.
10.4.2 Let the successive stages of the pre-revised scales $\mathrm{U}_{1}, \mathrm{U}_{2}, \mathrm{U}_{3}$, be denoted by

$$
\begin{array}{cc}
\mathrm{A}_{11}, \mathrm{~A}_{12}, \mathrm{~A}_{13}, \ldots \ldots \ldots . . \mathrm{A}_{1 \mathrm{n}} & \left(\text { Scale } \mathrm{U}_{1}\right) \\
\mathrm{A}_{21}, \mathrm{~A}_{22}, \mathrm{~A}_{23}, \ldots \ldots \ldots . \mathrm{A}_{2 \mathrm{n}} & \left(\text { Scale U } \mathrm{U}_{2}\right) \\
\mathrm{A}_{31}, \mathrm{~A}_{32}, \mathrm{~A}_{33}, \ldots \ldots \ldots . \mathrm{A}_{3 n} & \left(\text { Scale } \mathrm{U}_{3}\right) \\
\ldots & \ldots . . \\
\mathrm{A}_{\mathrm{n} 1}, \mathrm{~A}_{\mathrm{n} 2}, \mathrm{~A}_{\mathrm{n} 3}, \ldots & \ldots \ldots \mathrm{~A}_{\mathrm{nn}}
\end{array}
$$

The first subscript indicates the scale no. in the pre-revised system, while the second subscript denotes the stage in the pre-revised system.

The successive members of each of the revised scales belong to a number series defined by

$$
\mathrm{A}_{\mathrm{n}}=\mathrm{A}_{1} \cdot \mathrm{I}^{\mathrm{n}-1}
$$

10.4.3 Let $R_{1}, R_{2}, R_{3}, \ldots \ldots . \ldots . . . . . . . . . ., R_{n}$ be the revised scales corresponding to the pre-revised scales $U_{1}, U_{2}, U_{3}, \ldots \ldots . . U_{n}$ respectively.

The initial basic pay B in a revised scale is related to the basic pay A of a given stage in the pre-revised scale by the equation

$$
\begin{aligned}
\mathrm{B}=\mathrm{AM}+\mathrm{G}, \text { where } \mathrm{M} & =\text { multiplication factor } 1.86 \\
\mathrm{G} & =\text { grade pay }
\end{aligned}
$$

Since $G$ has been shown to be equal to AF, F being a fixed quantity for all the scales as indicated in a subsequent section.

$$
\mathrm{B}=\mathrm{A}(\mathrm{M}+\mathrm{F})
$$

If the basic pay in the initial stage of unrevised scale $U_{1}$ is $A_{11}$, the corresponding initial basic pay in the revised scales would be

$$
\begin{aligned}
& \mathrm{A}_{11} \cdot \mathrm{M}+\mathrm{A}_{11} \cdot \mathrm{~F}=\mathrm{AM}+\mathrm{AF} \\
&=\mathrm{P}+\mathrm{Q} \quad(\text { Putting } \mathrm{P}=\mathrm{AM} \\
&\mathrm{Q}=\mathrm{AF})
\end{aligned}
$$

The successive stages in the revised scale $\mathrm{R}_{1}$ would be

$$
(\mathrm{P}+\mathrm{Q}),(\mathrm{P}+\mathrm{Q}) \mathrm{I},(\mathrm{P}+\mathrm{Q}) \cdot \mathrm{I}^{2}, \ldots \ldots \ldots . \quad(\mathrm{P}+\mathrm{Q}) \cdot \mathrm{I}^{\mathrm{n}-1}
$$

As the basic pay at the second stage of the pre-revised scale $U_{1}$ is $A_{12}$, the corresponding initial basic pay in the revised scale $R_{1}$ would be

$$
\begin{aligned}
\mathrm{A}_{12} \cdot \mathrm{M}+\mathrm{A}_{11} \cdot \mathrm{~F}= & \mathrm{AI} \cdot \mathrm{M}+\mathrm{AF} \\
& =\mathrm{PI}+\mathrm{Q}
\end{aligned}
$$

The successive stages in the revised scale would be

$$
(\mathrm{PI}+\mathrm{Q}),(\mathrm{PI}+\mathrm{Q}) \mathrm{I},(\mathrm{PI}+\mathrm{Q}) \mathrm{I}^{2}, \ldots \ldots \ldots . . \quad(\mathrm{PI}+\mathrm{Q}) \mathrm{I}^{\mathrm{n}-1}
$$

The basic pay in the third stage of the pre-revised scale $U_{1}$ is $A_{13}$. The corresponding initial basic pay in the revised scale $\mathrm{R}_{1}$ would be

$$
\begin{aligned}
\mathrm{A}_{13} \cdot \mathrm{M}+\mathrm{A}_{11} \cdot \mathrm{~F} & =\mathrm{AI}^{2} \mathrm{M}+\mathrm{AF} \\
& =\mathrm{PI}^{2}+\mathrm{Q}
\end{aligned}
$$

The successive stages in the revised scale would be

$$
\left(\mathrm{PI}^{2}+\mathrm{Q}\right),\left(\mathrm{PI}^{2}+\mathrm{Q}\right) \mathrm{I},\left(\mathrm{PI}^{2}+\mathrm{Q}\right) \mathrm{I}^{2}, \ldots \ldots . \quad\left(\mathrm{PI}^{2}+\mathrm{Q}\right) \mathrm{I}^{\mathrm{n}-1}
$$

The set of numbers so obtained can be arranged in a tabular form in the following manner :

## Table 3

| Stage in the pre-revised scale $\mathrm{U}_{1}$ | Successive stages in the corresponding revised scale $\mathbf{R}_{1}$ |  |  |  |  |  |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: |
|  | 1 | 2 | 3 | 4 | ....... | n |
| $\mathrm{A}_{11}$ | $\mathrm{P}+\mathrm{Q}$ | (P+Q)I | $(\mathrm{P}+\mathrm{Q}) \mathrm{I}^{2}$ | $(\mathrm{P}+\mathrm{Q}) \mathrm{I}^{3}$ | ....... | $(\mathrm{P}+\mathrm{Q}) \mathrm{I}^{\mathrm{n}-1}$ |
| $\mathrm{A}_{12}$ | (PI+Q) | (PI+Q)I | $(\mathrm{PI}+\mathrm{Q}) \mathrm{I}^{2}$ | $(\mathrm{PI}+\mathrm{Q}) \mathrm{I}^{3}$ | $\ldots$ | $(\mathrm{PI}+\mathrm{Q}) \mathrm{I}^{\mathrm{n}-1}$ |
| $\mathrm{A}_{13}$ | $\left(\mathrm{PI}^{2}+\mathrm{Q}\right)$ | $\left(\mathrm{PI}^{2}+\mathrm{Q}\right) \mathrm{I}$ | $\left(\left(\mathrm{PI}^{2}+\mathrm{Q}\right) \mathrm{I}^{2}\right.$ | $\left(\mathrm{PI}^{2}+\mathrm{Q}\right) \mathrm{I}^{3}$ | . | $\left(\mathrm{PI}^{2}+\mathrm{Q}\right) \mathrm{I}^{\mathrm{n}-1}$ |
| $\mathrm{A}_{14}$ | $\left(\mathrm{PI}^{3}+\mathrm{Q}\right)$ | $\left(\mathrm{PI}^{3}+\mathrm{Q}\right) \mathrm{I}$ | $\left(\mathrm{PI}^{3}+\mathrm{Q}\right) \mathrm{I}^{2}$ | $\left(\mathrm{PI}^{3}+\mathrm{Q}\right) \mathrm{I}^{3}$ | $\ldots$ | $\left(\mathrm{PI}^{3}+\mathrm{Q}\right) \mathrm{I}^{\mathrm{n}-\mathrm{T}}$ |
| $\ldots$ | $\ldots .$. | ....... | ....... | ..... | $\ldots$ | $\ldots$ |
| $A_{1 n}$ | $\left(\mathrm{PI}^{\mathrm{n}-1}+\mathrm{Q}\right)$ | $\left(\mathrm{PI}^{\mathrm{n}-1}+\mathrm{Q}\right) \mathrm{I}$ | $\left(\mathrm{PI}^{\mathrm{n}-1}+\mathrm{Q}\right) \mathrm{I}^{2}$ | $\left(\mathrm{PI}^{\mathrm{n}-1}=\mathrm{Q}\right) \mathrm{I}^{3}$ | $\ldots$ | $\left(\mathrm{Pr}^{\mathrm{n}-1}+\mathrm{Q}\right) \mathrm{I}^{\mathrm{n}-1}$ |

The number system can be rearranged as shown in this following Table.

## Table 4

| Stages in the pre-revised scale $\mathrm{U}_{1}$ | Successive stages in the corresponding revised scale $\mathrm{R}_{1}$ |  |  |  |  |  |  |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: |
|  | (Numbers in the next row are to be added to the numbers of the respective column to get the basic pay for the respective stages) |  |  |  |  |  |  |
|  | 1 | 2 | 3 | 4 | 5 | ...... | n |
|  | Q | Q1 | $\mathrm{QI}^{2}$ | $\mathrm{QI}^{3}$ | $\mathrm{QI}^{4}$ | $\ldots$ | $\mathrm{QI}^{\mathrm{n}-1}$ |
| $\mathrm{A}_{11}$ | P | PI | $\mathrm{PI}^{2}$ | $\mathrm{PI}^{3}$ | $\mathrm{PI}^{4}$ | $\ldots$ | $\mathrm{PI}^{\mathrm{n}-1}$ |
| $\mathrm{A}_{12}$ | PI | $\mathrm{Pl}^{2}$ | $\mathrm{PI}^{3}$ | $\mathrm{PI}^{4}$ | $\mathrm{PI}^{5}$ | $\ldots$ | $\mathrm{PI}^{\mathrm{n}}$ |
| $\mathrm{A}_{13}$ | $\mathrm{Pl}^{2}$ | $\mathrm{Pl}^{3}$ | $\mathrm{PI}^{4}$ | $\mathrm{PI}^{5}$ | $\mathrm{PI}^{5}$ | $\ldots$ | $\mathrm{PI}^{\mathrm{n}-1}$ |
| $\mathrm{A}_{14}$ | Pl ${ }^{3}$ | Pl ${ }^{4}$ | PI ${ }^{5}$ | PI ${ }^{6}$ | $\mathrm{PI}^{6}$ | $\ldots .$. | $\mathrm{PI}^{\mathrm{n}-2}$ |
| $\ldots$ | ....... | ..... | .... | $\cdots$ | $\ldots$ | ..... | ..... |
| $\mathrm{A}_{1 \mathrm{n}}$ | $P \mathrm{I}^{\mathrm{n}-1}$ | $\mathrm{Pl}^{\mathrm{n}}$ | $\mathrm{PI}^{\mathrm{n+1}}$ | $\mathrm{PI}^{\mathrm{n}+2}$ | $\mathrm{PI}^{\mathrm{n+3}}$ | ..... | $\mathrm{PI}^{2 \mathrm{n}-1}$ |

10.4.4 Next let us consider the pre-revised scale $\mathrm{U}_{2}$

The initial basic pay for the scale $\mathrm{U}_{2}$ is $\mathrm{A}_{21}$. The corresponding initial basic pay in the revised scales $R_{1}$ would be given by

$$
(\mathrm{P}+\mathrm{Q}) \mathrm{I},(\mathrm{P}+\mathrm{Q}) \mathrm{I}^{2},(\mathrm{P}+\mathrm{Q}) \mathrm{I}^{2}, \ldots \ldots \ldots . \quad(\mathrm{P}+\mathrm{Q}) \mathrm{I}^{\mathrm{n}-1}
$$

The basic pay for the second stage in the scale $U_{2}$ is $A_{22}$. The corresponding initial basic pay in the scale $\mathrm{R}_{2}$ would be given by

$$
\begin{aligned}
\mathrm{A}_{22} \cdot \mathrm{M}+\mathrm{A}_{21} \cdot \mathrm{~F} & =\mathrm{A}_{21} \mathrm{I} \cdot \mathrm{M}+\mathrm{A}_{21} \cdot \mathrm{~F} \\
& \left.=\mathrm{A}_{11} \mathrm{I}^{2} \cdot \mathrm{M}+\mathrm{A}_{11} \mathrm{I} \cdot \mathrm{~F} \text { (since } \mathrm{A}_{21}=\mathrm{A}_{11} \cdot \mathrm{I}\right) \\
& =\mathrm{PI}^{2}+\mathrm{QI}
\end{aligned}
$$

and the subsequent stages by

$$
\left(\mathrm{PI}^{2}+\mathrm{QI}\right),\left(\mathrm{PI}^{2}+\mathrm{QI}\right) \mathrm{I},\left(\mathrm{PI}^{2}+\mathrm{QI}\right) \mathrm{I}^{2} \ldots . \quad\left(\mathrm{PI}^{2}+\mathrm{QI}\right) \mathrm{I}^{\mathrm{n}-1}
$$

Continuing in this way, the number system representing the successive stages in the revised scale $\mathrm{R}_{2}$ can be represented in a tabular form in the following manner :

## Table 5

| Stages in the unrevised scale $\mathrm{U}_{2}$ |  | Successive stages in the corresponding revised scale $\mathrm{R}_{2}$ |  |  |  |  |  |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: |
|  |  | Numbers in the next row are to be added to the numbers of the respective column to get the basic pay for the respective stages |  |  |  |  |  |
|  |  | 1 | 2 | 3 | 4 | $\ldots$ | n |
|  |  | QI | $\mathrm{QI}^{2}$ | $\mathrm{QI}^{3}$ | $\mathrm{QI}^{4}$ | $\ldots$ | $\mathrm{QI}^{\mathrm{n}-1}$ |
| 1 | $\mathrm{A}_{21}$ | PI | $\mathrm{PI}^{2}$ | $\mathrm{PI}^{3}$ | $\mathrm{PI}^{4}$ | ..... | $\mathrm{PI}^{\mathrm{n}-1}$ |
| 2 | $\mathrm{A}_{22}$ | $\mathrm{PI}^{2}$ | $\mathrm{PI}^{3}$ | $\mathrm{PI}^{4}$ | $\mathrm{PI}^{5}$ | ..... | $\mathrm{PI}^{\mathrm{n}}$ |
| 3 | $\mathrm{A}_{23}$ | $\mathrm{PI}^{3}$ | $\mathrm{PI}^{4}$ | $\mathrm{PI}^{5}$ | $\mathrm{PI}^{6}$ | $\ldots .$. | $\mathrm{PI}^{\mathrm{n+1}}$ |
| 4 | $\mathrm{A}_{24}$ | $\mathrm{PI}^{4}$ | $\mathrm{PI}^{5}$ | $\mathrm{PI}^{6}$ | $\mathrm{PI}^{7}$ | $\ldots$ | $\mathrm{PI}^{\mathrm{n}+2}$ |
| $\ldots$ | $\ldots$ | $\ldots$ | $\ldots$ | $\ldots$ | $\ldots$ | $\ldots$ | $\ldots$ |
| n | $\mathrm{A}_{2 \mathrm{n}}$ | $\mathrm{PI}^{\mathrm{n}}$ | $\mathrm{PI}^{\mathrm{n}+1}$ | $\mathrm{PI}^{\mathrm{n}+2}$ | $\mathrm{PI}^{\mathrm{n}+3}$ | $\ldots$ | $\mathrm{PI}^{2 \mathrm{n}-1}$ |

10.4.5 Comparison of Table 4 and Table 5 shows that the omission of the first column from Table 4 gives the number system for Table 5,

Proceeding in a similar manner, it can be shown that the successive stages in the revised scale $\mathrm{R}_{3}$ can be derived from Table 3 by omitting the first two columns.

Hence, the number system consisting of the $\mathrm{r}^{\text {th }}$ and the succeeding columns would provide the details of successive stages in the revised scale $\mathrm{R}_{\mathrm{r}}$.
10.4.6 Since $\mathrm{A}_{21}=\mathrm{A}_{11}$. I, an alternative way of deriving the number set of Table 5 is to multiply each member of the number set of Table 4 by I.
10.4.7 Table 2 serves as a comprehensive conversion table for all the pre-revised scales $U_{1}, U_{2}, \ldots \ldots \ldots, U_{n}$, and also as a descriptive table for successive stages of all the revised scales $R_{1}, R_{2}, R_{3}, \ldots \ldots . . R_{n}$.

The construction of Table 2 involves two sets of numbers, namely,

$$
\begin{array}{llll}
\text { P, PI, } \text { PI }^{2}, & \ldots \ldots . & \mathrm{PI}^{\mathrm{n}-1} \\
& & \\
\text { Q, QI, } \text { QI }^{2} . & \ldots \ldots . & \text { QI }^{\mathrm{n}-1}
\end{array}
$$

Whereas $\mathrm{P}=\mathrm{A} \times 1.86$ and $\mathrm{Q}=\mathrm{A} \times 0.915$

Thus the multitude of conversion tables involving numerous calculations is replaced by one single table which needs rather simple calculations for its construction.
10.4.8 The set of numbers below the first row in Table 4 is a symmetrical matrix. The position of any quantity in the matrix can be specified by a number system pq ( $\mathrm{p}=1,2,3, \ldots \ldots . ., \mathrm{q}=1,2,3, \ldots \ldots .$. where p and q denote the serial number of the column and row respectively of the matrix in which a particular quantity is situated. Thus, the index number 22 denotes the quantity $\left(\mathrm{PI}^{2}+\mathrm{QI}\right), 43$ denotes $\left(\mathrm{PI}^{5}+\mathrm{QI}^{3}\right)$ and so on. One increment in the revised scale would mean one-step movement along a given row (for example 3233 , or $\mathrm{PI}^{3}+\mathrm{QI}^{2}$ to $\mathrm{PI}^{4}+\mathrm{QI}^{3}$ ).
10.4.9 Index no. 22 stands for stage 2 of the revised scale $R_{1}$ and also stage 2 of the revised scale $\mathrm{R}_{2}$. Hence, a one-step jump along a given row (e.g. 22 24) would mean-first movement prior to placement in the next scale (e.g. $\mathrm{R}_{1}$ to $\mathrm{R}_{2}$ ), as is required during promotion. The next movement would be in diagonally upward directing i.e. 24 33. Table 4, therefore, provides a graphic descrip of the movement in terms of basic pay during career progression without any further calculation.
10.4.10 A precondition for having access to the simple scheme described above is minor adjustment in the different number series representing the successive stages of the existing scales by a method of trial and error so that each scale can be described as a particular segment of one and the same number series $\mathrm{A}, \mathrm{AI}, \mathrm{AI}^{2}, \ldots \ldots . \mathrm{AI}^{\mathrm{n}-1}$, henceforth to be denoted as the AI series.
10.4.11 The search for the number A begins with an attempt to fit the numbers representing the initial basic pay of the existing scales to an AI series. The AI series is uniqualy defined once the number A is selected.

This task has to be coupled with an attempt to fit the numbers representing the successive stages of each particular scale in the existing system to the same AI series.
10.4.12 The transition from the pre-revised to the revised scheme will be effected in two stages, the first one involving selection of the number series AI to which all the numbers belonging to the pre-revised scheme will be fitted, and the second one involving application of the transformation formula.

### 10.5 Search for a rationalized number system and determination of initial basic pay in the system

10.5.1 The search for a rationalised system as described in the preceding section led to the selection of a number series AI beginning with $\mathrm{A}=2097$ as shown in column 1 of Table 6 by a method of trial-and-error. The figures representing the initial basic pay for the existing scales are given in column 4 to indicate their degree of closeness to the chosen number series.

## Table 6

| Sl. No. | Members of the <br> selected number <br> series AI | Initial basic pay in the <br> existing scales and scale <br> no. |  | Percent by which the <br> figure in Col. 1 <br> exceed that in Col. 2 |
| :---: | :---: | :---: | :---: | :---: |
| 1 | 2907 | 1 | 2850 | 2.000 |
| 2 | 2994 |  |  |  |
| 3 | 3084 | 2 | 3000 | 2.800 |
| 4 | 3177 |  |  |  |
| 5 | 3272 |  |  |  |
| 6 | 3370 | 3 | 3325 | 1.353 |
| 7 | 3470 |  |  |  |
| 8 | 3575 | 4 | 3525 | 1.418 |
| 9 | 3683 |  |  |  |
| 10 | 3792 |  |  | 1.481 |
| 11 | 3907 | 5 | 3850 | 0.485 |
| 12 | 4024 |  |  |  |
| 13 | 4145 | 6 | 4125 |  |
| 14 | 4269 |  |  | 0.088 |
| 15 | 4397 |  |  |  |
| 16 | 4529 | 7 | 4525 |  |
| 17 | 4665 |  |  | 4800 |
| 18 | 4805 | 8 | 4040 |  |
| 19 | 4948 |  |  | 5000 |
| 20 | 5097 | 9 | 504 |  |

10.5.2

One way of bringing about fitment of basic pay at successive stages of the pre-revised scales to the aforesaid number series in which the sequential order is maintained in both the series in order to demonstrate one-to-one correspondence between the two is shown in Table 6.1. The fitment scheme developed in this manner is marked by
large differences between the figures of the basic pay series and the rationalized number series in the higher stages of Scale nos. 1 and 2 (to the extent of 31 percent) as well as Scale nos. 3 and 4 (to the extent of 17 percent). This is a reflection of the comparatively low rate of growth of basic pay for these scales.
10.5.3 Table 6 gives the amount in percent by which the initial basic pay in the pre-revised scale has to be stepped up in order to be even with the corresponding figure in the number series to which it is fitted. Figures for the $10^{\text {th }}$ and $20^{\text {th }}$ stages of the different scales are shown in Table 6.2. The problem is, therefore, to develop a fitment scheme so that the difference may be kept within tolerable limits.

Table 6.2

| Scale No. | Amount in percent by which a figure in the N-Series <br> exceeds the basic pay corresponding to this figure |  |
| :---: | :---: | :---: |
|  | $10^{\text {th }}$ stage of <br> the scale | $20^{\text {th }}$ stage of <br> the scale |
|  | 10.91 | 24.01 |
| 2 | 9.05 | 19.91 |
| 3 | 5.32 | 10.97 |
| 4 | 2.53 | 7.16 |
| 5 | 2.45 | 4.60 |
| 6 | 1.54 | 0.46 |
| 7 | 0.71 | 1.20 |
| 8 | 0.77 | 3.14 |
| 9 | 2.26 | 2.24 | successive stages of these scales to a number series in which each member is related to the next in the series by the equation

$$
\begin{array}{cc} 
& \mathrm{An}=\mathrm{A}_{\mathrm{n}-1} \cdot(1.03) \\
\text { when } & \mathrm{n}=2.3,4, \ldots \ldots \ldots
\end{array}
$$

The manner in which the numbers representing the basic pay at different stages in the pre-revised scales are related to one another is very different from the one given by the aforesaid equation. Fitment to the number series has, therefore, to proceed by a method of approximation.
10.5.5 Fitment may proceed by placing the figure representing the initial basic pay of a pre-revised scale beside a figure in the number series with which its difference is minimum. Thereafter, the successive figures of the two number sequences are placed side by side in serial order to check the degree of fitment, keeping in view the fact that the method of approximation works only when the differences in percentages between the numbers in the same row are as small as possible.
10.5.6 Application of the method of approximation leads to frequent pairing of two figures of the basic pay series in the same box. This is particularly prominent for Scale nos. 1 to 4 in which the basic pay grows at a rate much lower than 3 percent per year over the entire or the greater part of the respective scales. For Scale nos. 1 and 2, the problem is one of maintaining a proper balance between the limitations imposed on these scales by low growth rates and the urgency to follow the method of approximation as closely as possible. Pairing of figures of the basic pay
series in the same box keeps the difference between the figures in the basic pay series and the number series within a certain limit. A limit of 10 percent has, however, been imposed on the highest stages of Scale nos. 1 to 4, while allowing one-to-one fitment for the first ten consecutive stages.

For Scale nos. 6 to 9 where the rate of growth is around 3 percent per year for large segments of the scales, instances of placing two figures in the scale box are much less frequent than in the case of Scale nos. 1 to 4. The balancing procedure has resulted in a fitment scheme the details of the fitment are worked out in Table 7.
10.5.7 Based on the fitment scheme developed in Table 7,

Table 7.1 has been devised to gives the basic pay at the entry points in the domains of revised scales corresponding to basic pay at different stages in the respective pre-revised scales. Table 7.1 also shows 'band pay' and grade pay at the entry points in the domains. The calculated values of basic pay in the revised scales have been rounded off to the next hundred.
10.5.8 Based on the detailed information provided in Table made for cases where the initial basic pay in the revised scale works out to be the same for two consecutive stages. Such cases shall be dealt with by advancing the basic pay at the higher of the two stages by 50 in Scale nos. 1 to 5 and by 100 in Scales nos. 7 to 9 , both at the entry point of the revised scale and at subsequent stages in the revised scale, till placement in a higher scale on promotion or under Career Advancement Scheme.

## $10.6 \quad$ Rationalization of Grade Pay

10.6.1 Grade pay corresponding to a given scale has been defined as an amount equal to 40 percent of the basic pay at the end of the pre-revised scale. Let us consider a rationalized system in which annual increment takes place at the rate of 3 percent of basic pay on a cumulative basis for all scales under the system. If the basic pay at the end of a scale is given by $A_{n}$, the grade pay $G$ will be obtained as

$$
\begin{aligned}
\mathrm{G} & =0.4 \mathrm{~A}_{\mathrm{n}} \\
& =0.4 \mathrm{~A}_{1}(1.03)^{\mathrm{n}-1}
\end{aligned}
$$

If the pay scale has a span of 29 years, for example,

$$
\begin{aligned}
\mathrm{G} & =(0.4 \times 2.2879) \mathrm{A}_{1} \\
& =0.915 \mathrm{~A}_{1}
\end{aligned}
$$

The multiplication factor 0.915 will henceforth be denoted by the letter F .
The factor F ( $=0.915$ in the instant cases) by which the initial basic pay $A_{1}$ has to be multiplied to obtain $G$ is thus the same or all scales under the rationalized scheme.
10.6.2 Let us consider the case of calculation of grade pay in the existing system which has not been brought under the purview of rationalization. While the Scale no. 1 has a span of 29 years and Scale No. 6 of 29 years, all others are of 28 year span. The end of the Scale No. 1 may be obtained notionally by adding four increments to the last basic pay while the basic pay at the $28^{\text {th }}$ stage is taken into consideration for calculation of grade pay for Scale no.6. The basic pay at the $28^{\text {th }}$ stage for all the scales and the corresponding grade pay for the respective scales are shown in the following Table 8.

Table 8

| Scale No | Basic pay at <br> $28^{\text {th }}$ stage | $40 \%$ of basic pay at <br> stage 28 | Figures rounded off <br> to nearest 100 |
| :---: | :---: | :---: | :---: |
| 1 | 4700 | 1880 | 1900 |
| 2 | 5230 | 2092 | 2100 |
| 3 | 6325 | 2530 | 2600 |
| 4 | 7050 | 2820 | 2900 |
| 5 | 8075 | 3230 | 3300 |
| 6 | 9475 | 3790 | 3800 |
| 7 | 10175 | 4070 | 4100 |
| 8 | 10925 | 4370 | 4400 |
| 9 | 11325 | 4530 | 4600 |

10.6.3 For the rationalized system adopted here, grade pay could be calculated as a fixed multiple (0.915) of the initial basic pay as shown in the following Table 9:

Table 9

| Scale No. | Initial basic pay for the <br> respective scales in the <br> rationalized system | Grade pay <br> $=$ initial basic pay <br> $\times 0.915$ |
| :---: | :---: | :---: |
| 1 | 2907 | 2660 |
| 2 | 3084 | 2822 |

| 3 | 3370 | 3084 |
| :---: | :---: | :---: |
| 4 | 3575 | 3271 |
| 5 | 3907 | 3575 |
| 6 | 4145 | 3792 |
| 7 | 4529 | 4144 |
| 8 | 4805 | 4397 |
| 9 | 5097 | 4664 |

Comparison of the figures in the third column for the two Tables shows that a close agreement exists for scales 6 to 9 . The disparity in the case of Scale Nos. 1 to 4 is largely attributable to low rate of progression. There will be no rounding off of these figures at this stage.
10.6.4 Attention has been drawn in the preceding chapter to the problems arising out of the attempt to develop a fitment scheme for the figures representing basic pay at successive stages in the pre-revised scales to the rationalized number series in their exact sequential order. Large differences in the middle and higher stages in the case of Scale nos. 1 to 4 have necessitated the adoption of scheme based primarily on the method of approximation while keeping in view the limitations imposed by low rates of growth for these scales. Table 7 gives the fitment scheme that results from the balancing endeavour as well as the new set of values of grade pay obtained as 40 percent of the figures in the number series corresponding to the basic pay at the $28^{\text {th }}$ stage of the pre-revised scales. Though departing from the ideal pattern given in Table 9 to a certain extent these figures are essentially a part of the framework based on the rationalized number system.

## 10.7 <br> The form of the revised pay structure

10.7.1 Table 10 and Table 12 provide a comprehensive view of the revised pay structure. These Tables have been constructed in the pattern of Table 4, and have been designed to address all the questions pertaining to the revised pay structure. The numerical values used in the construction of the Tables are

$$
A=2907
$$

$$
M=1.86
$$

So that $\mathrm{P}=\mathrm{AM}=5407$

Value of $Q$ as members of a series given by

$$
\mathrm{Q}=2039 .(1.03)^{\mathrm{n}-1}
$$

The successive numbers in any column below the horizontal bold line belong to a series given by

$$
\mathrm{A}_{\mathrm{n}}=\mathrm{A}_{1} \mathrm{I}^{\mathrm{n}-1}
$$

When $\mathrm{I}=1.03$
The successive numbers in any row to the right of the vertical bold line also belong to a series given by the same equation.

The row containing the succession of numbers in the row above the horizontal bold line will henceforth be known as Row Q .
10.7.2 The column to the left of the vertical bold line will henceforth be called column N and the symmetrical matrix below the $20^{\text {th }}$ row and to the right of the vertical bold line as the PI matrix in conformity with the nomenclature adopted for Table 4. The reason for extending the P I matrix from $20^{\text {th }}$ row in the upward direction will be apparent in the subsequent sections.

The existing pay scales in their rationalized version are represented by different segments of column N. Assuming that each scale is of 30 -year span, the arrangement is indicated in the following Table. (Table 11)

Table 11

| Scale <br> no. | Segment covered by rows in column N <br> having serial nos. |
| :---: | :---: |
| 1 | $31-60$ |
| 2 | $33-62$ |
| 3 | $36-65$ |
| 4 | $38-67$ |
| 5 | $41-70$ |
| 6 | $43-72$ |
| 7 | $46-75$ |
| 8 | $40-77$ |
| 9 |  |

10.7.3 Figures in Table 10 on either side of the vertical line between column C and column 1 of the PI matrix and placed diagonally upwards with respect to each other are related by the equation

$$
\mathrm{P}=\mathrm{A} \times 1.86
$$

Since the PI matrix is symmetrical, all figures along upward moving diagonals are identical.

Figures representing the members of the $\mathrm{Q}_{\mathrm{n}}$ series belong to Row Q and are indicated at the top of the respective columns, the letter n denoting the column number in the PI matrix.

The value of $n$ for the members of the $\mathrm{Q}_{\mathrm{n}}$ series which represent the grade pay for the different scales as shown in Table 7 are indicated in the following Table.

#### Abstract

10.7.4 Figures in column N represent the successive members of the rationalized number series. The manner in which basic pay at the successive stages of the pre-revised scale have been fitted to the number series has been shown in Table 7.1 and described in Section 10.5. Multiplication by 1.86 gives the corresponding 'band pay' $(\mathrm{P})$ components of the basic pay at the entry points of the revised scales. The numerical values of the 'band pay component' for a given scale define a series (henceforth to be referred to as P series) which come to occupy a particular column in the Table 10. One member of the $\mathrm{Q}_{\mathrm{n}}$ series representing the grade pay for the scale also belongs to the same column. The identity of all such column in the PI matrix has been indicated in Table 13.

## Table 13

| Scale | Grade pay as <br> No. <br> numerical value <br> corresponding to the <br> position of the <br> members of the $\mathrm{Q}_{\mathrm{n}}$ <br> series | Column no. in the <br> PI matrix indicating <br> the position of the <br> member in the $\mathrm{Q}_{\mathrm{n}}$ <br> series |
| :---: | :---: | :---: |
|  |  |  |

| 1 | 2039 | 1 |
| :---: | :---: | :---: |
| 2 | 2228 | 4 |
| 3 | 2660 | 10 |
| 4 | 2907 | 13 |
| 5 | 3370 | 18 |
| 6 | 3906 | 23 |
| 7 | 4144 | 25 |
| 8 | 4397 | 27 |
| 9 | 4664 | 29 |

10.7.5 The box showing the value of P in any of the columns in Table 10 corresponding to a particular figure contained in a box of column N of the same Table can be reached by moving diagonally upwards from the box in column Nz till the column earmarked for the relevant scale is reached, as illustrated in the following figure.

| $\boldsymbol{C}$ | 1 | 2 | 3 | 4 | 5 | 6 | 7 | 8 | 9 | 10 | 11 | 12 | 13 |
| :--- | :--- | :--- | :--- | :--- | :--- | :--- | :--- | :--- | :--- | :--- | :--- | :--- | :--- |
|  |  |  |  |  |  |  |  |  |  |  |  |  |  |
|  |  |  |  |  |  |  |  |  |  |  |  |  |  |
|  |  |  |  |  |  |  |  |  |  |  |  |  | 6650 |
|  |  |  |  |  |  |  |  |  |  | 6268 |  |  |  |
|  |  |  |  |  |  |  |  |  |  |  |  |  |  |
|  |  |  |  |  |  |  |  |  |  |  |  |  |  |
|  |  |  |  | 5736 |  |  |  |  |  |  |  |  |  |
|  | 5407 |  |  |  |  |  |  |  |  |  |  |  |  |

| 2907 |  |  |  |  |  |  |  |  |  |  |  |  |  |
| :--- | :--- | :--- | :--- | :--- | :--- | :--- | :--- | :--- | :--- | :--- | :--- | :--- | :--- |
|  |  |  |  |  |  |  |  |  |  |  |  |  |  |
| 3084 |  |  |  |  |  |  |  |  |  |  |  |  |  |
|  |  |  |  |  |  |  |  |  |  |  |  |  |  |
|  |  |  |  |  |  |  |  |  |  |  |  |  |  |
| 3370 |  |  |  |  |  |  |  |  |  |  |  |  |  |
|  |  |  |  |  |  |  |  |  |  |  |  |  |  |
| 3575 |  |  |  |  |  |  |  |  |  |  |  |  |  |

Since the PI matrix is symmetrical, the value of P is the same for all boxes lying along the same diagonal. The figures within the boxes lying at the intersection of the diagonal with the columns earmarked for different scales are probable candidates for membership of the $\mathrm{P}+$ series for these scales.
10.7.6 Addition of the figures of the $\mathrm{Q}_{\mathrm{n}}$ series given at the top of each column of Table 10 to the figures in the successive rows of the same columns $(\mathrm{B}=\mathrm{P}+\mathrm{Q})$ gives the $(\mathrm{PI}+\mathrm{Q})$ matrix for Table 12. While the marked columns in Table 10 include members of the P-series, the same columns in Table 12 may be said to house members of the series (B series) denoting basic pay in the revised scales. Table 11.1 gives the basic pay at the entry points in the domains of revised scales corresponding to the basic pay at different stages in the respective pre-revised scales.
10.7.7 If diagonal movement from a box in column N of Table 12 leads to a box in any of the marked columns, the figure in column N of Table 12 leads to a box in any of the marked columns, the figure in the second box would represent the basic pay in the respective revised scale corresponding to the value of basic pay in the pre-revised scale (in its rationalized version) contained in the first box. This is, of course, a
theoretical value and a part of the rationalized framework, and needs to be rounded off to the nearest 100 for practical application.
10.7.8 Movement from one column to the next along the same row involves an increase in numerical value by 3 percent. The corresponding figures in the boxes represent successive stages of the relevant scales in the revised scheme.
10.7.9 Table 14 reproduces a portion of Table 12 beginning with column 18 and row 2.4.

## Table 14

| $\mathbf{N}$ | 18 | 19 | 20 | 21 | 22 |
| :--- | :--- | :--- | :--- | :--- | :--- |

| 24 | 3907 | 10636 | 10955 | 11284 | 11622 | 11971 |
| :--- | :--- | :--- | :--- | :--- | :--- | :--- |
| 25 | 4924 | 10854 | 11180 | 11515 | 11861 | 12216 |
| 26 | 4145 | 11079 | 11411 | 11753 | 12106 | 12469 |
| 27 | 4269 | 11310 | 11649 | 11999 | 12359 | 12730 |
| 28 | 4397 | 11548 | 11895 | 12251 | 12619 | 12998 |

Figures in column 18 of Table 12 represent the initial basic pay in the revised scale corresponding to stages 1 to 5 in the pre-revised Scale no. 5. As expected, these figures do not belong to an ordered sequence. Figures in rows 42 to 46 in column N have been shifted diagonally and brought to juxtaposition with the figures in rows 24 to 28 of column 18 to demonstrate the correspondence between the figures in the prerevised and revised scales. Figures in the same row belonging to columns 19 to 22 represent the basic pay at the successive stages of the revised scales. When the initial
basic pay is given in a particular row of column 18 (say 11310), movement along the same row leads to boxes containing the figures $11649,11999,12359,12730 \ldots$. which, stated in that order, represent the basic pay at successive stages of the revised scale.
10.7.10

The first row and the first column of the matrix shown in Table 14 are represented by different sets of numbers. Derivation of Table 12 through addition of $\mathrm{Q}_{\mathrm{n}}$ to each member of the PI matrix of Table 10 has led to loss of symmetry. In Table 14, the entire matrix has to be involved to describe the basic pay at the entry points of the revised scale as well as the successive stages. The matrix may be defined as the domain for Scale no. 5 in the revised scheme.
10.7.11 Table 15 reproduces a portion of Table 10 beginning with column 18 and row 24 as in the case of Table 14. As indicated earlier, the figures in Table 15 defines a symmetrical matrix. The first column of Table 15 gives the P values ( $\mathrm{P}=$ Basic pay x 1.86 ) corresponding to basic pay in the pre-revised scale in its rationalized version. The P -series is analogous to the 'band pay series' of the $6^{\text {th }}$ Central and $5^{\text {th }}$ State Pay Commission.

Table 15

| C | 18 | 19 | 20 | 21 | 22 |
| :--- | :--- | :--- | :--- | :--- | :--- |

| 24 | 3907 | 7267 | 7485 | 7709 | 7940 | 8179 |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: |
| 25 | 4024 | 7485 | 7709 | 7940 | 8179 | 8424 |
| 26 | 4145 | 7709 | 7940 | 8179 | 8424 | 8677 |
| 27 | 4269 | 7904 | 8179 | 8424 | 8677 | 8937 |
| 28 | 4397 | 8179 | 8424 | 8677 | 8937 | 9205 | of their functional significance. While the figure within each box in table 14 represents the basic pay at one stage or another in a given domain, the first column in Table 15 is relevant only for the purpose of defining 'band pay' at the points of entry to the domain. Table 16 shows has 'band pay' value for other boxes may be worked out by subtracting the grade pay for Scale no. 5 from each of the boxes of Table 14. Unlike Table 12, the figures in the same row do not constitute a series which can be defined in terms of

$$
\mathrm{A}_{\mathrm{n}}=\mathrm{A} \cdot(1.03)^{\mathrm{n}-1}
$$

10.7.13 The importance of Table 10, however lies in the fact that the PI matrix contained therein constitute the basis on which Table 12 has been constructed. Although Table 10 is of limited value in providing information on the 'band pay' values for all possible stages of the revised scales, Table 12 is comprehensively informative in respect of determination of initial basic pay, basic pay at subsequent stages and basic pay admissible on promotion over the entire range of the domains of the revised scales.

## Table 16

| C | 18 | 19 | 20 | 21 | 22 |
| :---: | :---: | :---: | :---: | :---: | :---: |
| 3907 | 7267 | 7585 | 7914 | 8252 | 8601 |
| 4024 | 7485 | 7810 | 8145 | 8491 | 8846 |
| 4145 | 7709 | 8041 | 8383 | 8736 | 9099 |
| 4269 | 7940 | 8279 | 8629 | 8989 | 9360 |
| 4397 | 8179 | 8525 | 8881 | 9249 | 9628 |

Movement from one column to the next along the same row involves an increase in numerical value by 3 percent. The corresponding numerical figures in the boxes represent the successive stages of the relevant scales in the revised scheme. For example, Table 8 gives figure 14757 as the basic pay in the revised scheme corresponding to the $6^{\text {th }}$ stage of the existing scale no.8. To know the subsequent stages,
one has to proceed along the same $6^{\text {th }}$ row across the columns and obtain the figures $15200,15656,16125,16609, \ldots \ldots$. which represent the basic pay at stages $7,8,9,10$, ........ respectively.

Table 7A shows the basic pay at successive stages in the pre-revised scheme arranged in serial order along nine columns corresponding to Scale no. 1 to Scale no. 9. The figure within each box in a column at the top of which the Scale no. is indicated represents the basic pay at a particular stage of that scale. For convenience of description in general terms, the name F1 may be applied to the figure so obtained. Movement along the row in which the box containing F1 is situated leads to another box belonging to Column N which contains the rationalised equivalent of F 1 . The name F2 may be given to this figure belonging to the N -Series.

Table 12 also includes the Column N in which the position of the box containing F2 may be marked. Movement along the row in which the box containing F2 is located leads to another box in the column at the top of which the Scale no. is indicated. For convenience of description, the figure within the latter box may be denoted by F3. F3 is the initial basic pay in the revised scheme corresponding to F1 in the pre-revised scheme.
10.8

Movement across the pay domains during promotion
10.8.1 Movement from a base post to a promotional post or from one promotional post to the next involves a specific pattern of movement from one box to another within Table 12. Transition to the next promotional scale would be brought about in two stages :
(1) Stage 1: Movement to next box in the same row;
(2) Stage 2: Diagonally upward movement from the new position reached in the first stage
(a) by two steps if promotion implies movement from
i) Scale 6 to Scale 7
ii) Scale 7 to Scale 8
iii) Scale 8 to Scale 9

## or

# (b) by three steps if promotion implies movement from 

i) Scale 1 to Scale 2
ii) Scale 3 to Scale 4
or
(c) by five steps if promotion implies movement from
i) Scale 4 to 5
ii) Scale 5 to 6
or
(d) by six steps if promotion implies movement from
i) Scale 2 to Scale 3
10.8.2 The figure within the box where one reaches after the second movement gives the initial basic pay in the promotional scale. Basic pay in subsequent stages in the promotional scale would be represented by the figures obtained successively while traveling along the same row in which the box lies. The first stage implies granting of an increment in the prepromotional scale and the second stage implies replacement of the grade pay of the pre-promotional scale by the grade pay of the promotional scale.
10.8.3 The procedure outlined above has been derived from Article 13 (i) of GOI Notification No.S.S.R.622(E) dated 29 ${ }^{\text {th }}$ August 2008 which stipulates as follows :
"One increment equal to $3 \%$ of the sum of the pay in the pay band and existing grade pay will be computed ......... . This will be added to the existing pay in the pay band. The grade pay corresponding to the promotion post will thereafter be granted in addition to this pay in the pay band"

Care has been taken to observe the stipulations as closely as possible while remaining within the framework of Table 10 and Table 12. This was planned in order to avoid the confusion that may arise due to multiplicity of conversion tables/ready reckoners as well as extra calculations.
10.8.4 Let us consider a concrete example to focus on the relevant points. The numbers 16125 in col. 30 , row 27, in Table 12 represents the basic pay at a particular stage of Scale no. 8 in the revised scheme. Promotion from this stage to Scale no. 9 would involve two movements:

1. Movement along row 27 to the next box, namely col. 31, row 27. The number in the box is 16609 .
2. Movement along the diagonal by two steps whereby one reaches the box at col. 33 , row 25 . The number in the box is 16911 .

The two numbers at the ends of the diagonal would record the change in grade pay corresponding to the change from Scale no. 8 to Scale no.9. The difference amounting to 302 (=16609-16911) would be equal to the difference in grade pay.
10.8.5 The difference in grade pay can, however, be obtained directly from the row Q of Table 10. The grade pay increase from Scale no. 8 to Scale no. 9 amounts to (4664-4397) or 267 . The value obtained in the preceding paragraph exceeds this value by 35 ( $=302-267)$.
10.8.6 Since the number 35 is 0.210 percent of 16609 , one would be justified in neglecting this small deviation and continue to regard Table 12 as comprehensively informative in all respects. One may even be inclined to regard the number as an additional amount granted to the promotee, however small the amount may be, so as to make all the figures fit into the framework of Table 12.
10.8.7 The single example may not be enough to get an idea of the possible variation across the domains. The following analysis is undertaken to cover all such cases.
10.8.8 Each column in Table 10 and Table 12 is a potential candidate for definition of the beginning of a pay domain. Figures in Row Q of Table 10 represent the 'grade pay' corresponding each of such theoretically conceived pay domains. Let the grade pay for these domains be designated as $\mathrm{Q}_{1}, \mathrm{Q}_{2}, \mathrm{Q}_{3} \ldots \ldots \ldots, \mathrm{Q}_{\mathrm{n}}$.
10.8.9 Pay fixation during promotion involves two steps, namely :

Step 1: Granting of an additional increment in the existing scale;

Step 2: $\quad$ Replacement of the grade pay of the existing scale by the grade pay of the promotional scale, keeping the 'band pay' unaltered.
10.8.10 Movement on promotion from the domain beginning with the $\mathrm{n}^{\text {th }}$ column to the domain beginning with the $(\mathrm{n}+2)^{\text {th }}$ column involves replacement of grade pay $\mathrm{Q}_{\mathrm{n}}$ by $\mathrm{Q}_{\mathrm{n}+2}$. There will thus be an increase in grade pay given by

$$
\mathrm{q}_{\mathrm{n}}=\mathrm{Q}_{\mathrm{n}+2}-\mathrm{Q}_{\mathrm{n}}
$$

10.8.11 Different points within the first named domain belong to the $(\mathrm{n}+\mathrm{r})^{\text {th }}$ columns when $r=0,1,2,3, \ldots \ldots$

Promotion involves movement of these points to points on the $[(\mathrm{n}+\mathrm{r})+2]^{\text {th }}$ columns when the basic pay changes from $\mathrm{B}_{(\mathrm{n}+\mathrm{r})}$ to $\mathrm{B}_{(\mathrm{n}+\mathrm{r})+2}$.

The change in basic pay may be described by the following equations:

$$
\begin{aligned}
& \mathrm{B}_{\mathrm{n}+\mathrm{r}}=\mathrm{P}_{\mathrm{n}+\mathrm{r}}+\mathrm{G}_{\mathrm{n}+\mathrm{r}} \\
& \mathrm{~B}_{(\mathrm{n}+\mathrm{r})+2}=\mathrm{P}_{\mathrm{n}+\mathrm{r}}+\mathrm{G}_{(\mathrm{n}+\mathrm{r})+2}
\end{aligned}
$$

The letters P and G denoting 'band pay' and grade pay respectively.
10.8.12 From these equations one obtains $\mathrm{g}_{\mathrm{n}+\mathrm{r}}$ which equals

$$
\begin{aligned}
\mathrm{g}_{\mathrm{n}+\mathrm{r}} & =\mathrm{G}_{(\mathrm{n}+\mathrm{r}) 2}-\mathrm{G}_{\mathrm{n}+\mathrm{r}} \\
& =\mathrm{B}_{(\mathrm{n}+\mathrm{r})+2}-\mathrm{B}_{(\mathrm{n}+\mathrm{r})}
\end{aligned}
$$

The quantity $g_{n+r}$ equals $q_{n}$ when $r=0$. For all other
values of $r$,

$$
\mathrm{G}_{\mathrm{n}+\mathrm{r}}>\mathrm{q}_{\mathrm{n}} .
$$

For a given value of $n, g_{n+r}$ can be calculated for different values of $r(r=1,2,3$, $\ldots \ldots \ldots$ ) as shown in Table 28, making use of the values of $\mathrm{B}_{(\mathrm{n}+\mathrm{r})+2}$ and $\mathrm{Bn}+\mathrm{r}$ given in Table 12.
10.8.13 The following observations can be made on the basis of the data provided in Table 12 and Table 16.1.
i) For $\mathrm{n}=23$, the column in Table 12 which marks the entry to the domain of Scale no.6, the minimum value of basic pay in column no. $33(=n+10)$ is 15921 . The maximum value of $\left(g_{n+r}-q_{n}\right)$ in column 3 of Table 16.1.A, which amounts to 81 , constitutes 0.509 percent of this value.
ii) For $\mathrm{n}=25$, the column in Table 12 which marks the entry to the domain of Scale no.7, the minimum value of basic pay in column
no. $35(=n+10)$ is 16890 . The maximum value of $\left(g_{n+r}-q_{n}\right)$ in column 3 of Table 16.1.B, which amounts to 57, constitutes 0.515 percent of this value.
iii) For $\mathrm{n}=27$, the column in Table 12 which marks the entry to the domain of Scale no.8, the minimum value of basic pay in column no. $37(=n+10)$ is 18097. The maximum value of $\left(g_{n+r}-q_{n}\right)$ in column 3 of Table 16.1.C which amounts to 93, constitutes 0.574 percent of this value.

## Table 16.1

Departure $d_{n}\left(=g_{n+r}-q_{n}\right)$ during change of domain due to promotion
(In view of the fact that movement to the promotional stage generally takes place before completion of 10 years of service in a particular scale, data are entered for 10 rows only in each column.)

10.8.14 The percentage values quoted above mark the maximum deviation that may occur in the respective cases. There is thus a close agreement between the procedure adopted here for the determination of basic pay at the entry point of the promotional stage on the basis of two-stage movement in Table 12 and the stipulations of Article 13(i) of GOI notification no. G.S.R. dated $29^{\text {th }}$ August, 2008.
10.8.15 Next let us consider the cases where promotion implies diagonal movement in Table 12 in three steps. The general formula for increase in grade pay corresponding to movement to the promotional scale would be given by

$$
\mathrm{q}_{\mathrm{n}}=\mathrm{Q}_{\mathrm{n}+3}-\mathrm{Q}_{\mathrm{n}}
$$

and the expression for $\mathrm{g}_{\mathrm{n}+\mathrm{r}}$ is given by

$$
\mathrm{g}_{\mathrm{n}+\mathrm{r}}=\mathrm{B}_{(\mathrm{n}+\mathrm{r})+3}-\mathrm{B}_{(\mathrm{n}+\mathrm{r})}
$$

As before, $\mathrm{g}_{\mathrm{n}+\mathrm{r}}$ can be calculated for different values of $\mathrm{r}(\mathrm{r}=1,2,3, \ldots)$ as shown in Table 16.2, making use of the values of $\mathrm{B}_{(\mathrm{n}+\mathrm{r})+3}$ and $\mathrm{B}_{\mathrm{n}+\mathrm{r}}$ as given in Table 12 .
10.8.16 The observations that can be made on the basis of the data provided in Table 12 and Table 16.2 are summarized in Table 16.3.

## Table 16.2

| 1 | 1 | 11 | 10004 | 65 | 0.650 |
| 3 | 10 | 20 | 11999 | 84 | 0.700 |

The differences appear to be within tolerable limits.

### 10.9 On the concept of pay band

10.9.1 Definitions have been provided for various terms used in different articles of West Bengal Services ROPA Rules 2009. A notable omission, however, is 'pay band'. The terms such as 'running pay band', 'revised pay band', 'pay in the pay band', 'name of pay band' have been used freely without making clear what one means by the term 'pay band'.
10.9.2 The transformation formula for passage from the pre-revised to the revised scales is briefly.

$$
\mathrm{B}=\mathrm{AM}+\mathrm{G}
$$

Where $\quad \mathrm{B}=$ Initial basic pay in the revised scale corresponding to
do basic pay A at a given stage in the prescribed scale
$\mathrm{M}=$ Multiplication factor 1.86
$\mathrm{G}=0.4$ times the last basic pay in the pre-revised scale.
10.9.3 Given that the annual increment in the revised scale would take place at the rate of 3 percent of basic pay at all stages, the basic pay at successive stages in the revised scale would be given by

$$
\begin{aligned}
\mathrm{B}_{\mathrm{n}} & =\mathrm{B}_{\mathrm{n}-1} \cdot \mathrm{I} \\
& =\mathrm{B}_{1} \cdot \mathrm{I}^{\mathrm{n}-1} \\
\text { when } \mathrm{I} & =1.03 .
\end{aligned}
$$

Accordingly, the basic pay in the successive stages of the revised scale corresponding to the successive stages of the pre-revised scale can be represented in a tabular form in the following manner.

## Table 17

| Successive <br> stages in the <br> pre-revised <br> scale | Successive stages in the revised scale |  |  |  |  |
| :---: | :---: | :---: | :---: | :---: | :---: |
|  | 1 | 2 | 3 | $\cdots$ |  |
| 1 | $\mathrm{~A}_{1}$ | $\mathrm{~B}_{11}=\mathrm{A}_{1} \mathrm{M}+\mathrm{G}$ | $\mathrm{B}_{12}=\left(\mathrm{A}_{1} \mathrm{M}+\mathrm{G}\right) \mathrm{I}$ | $\mathrm{B}_{13}=\left(\mathrm{A}_{1} \mathrm{M}+\mathrm{G}\right) \mathrm{I}^{2}$ | $\cdots$ |
| 2 | $\mathrm{~A}_{2}$ | $\mathrm{~B}_{21}=\mathrm{A}_{2} \mathrm{M}+\mathrm{G}$ | $\mathrm{B}_{22}=\left(\mathrm{A}_{2} \mathrm{M}+\mathrm{G}\right) \mathrm{I}$ | $\mathrm{B}_{23}=\left(\mathrm{A}_{2} \mathrm{M}+\mathrm{G}\right) \mathrm{I}^{2}$ | $\cdots$ |
| 3 | $\mathrm{~A}_{3}$ | $\mathrm{~B}_{31}=\mathrm{A}_{3} \mathrm{M}+\mathrm{G}$ | $\mathrm{B}_{32}=\left(\mathrm{A}_{3} \mathrm{M}+\mathrm{G}\right) \mathrm{I}$ | $\mathrm{B}_{33}=\left(\mathrm{A}_{3} \mathrm{M}+\mathrm{G}\right) \mathrm{I}^{2}$ | $\cdots$ |
| $\cdots$ | $\cdots$ | $\cdots$ | $\cdots$ | $\cdots$ | $\cdots$ |
| $\cdots$ | $\cdots$ | $\cdots$ |  |  |  |

The first letter of the subscript of $\mathrm{B}_{\mathrm{pq}}$ denotes the stage in the prerevised scale and the second latter the stage in the revised scale. The subscript of $\mathrm{A}_{\mathrm{r}}$ denotes the stage in the pre-revised scale.
$\mathrm{B}_{11}, \mathrm{~B}_{12}, \mathrm{~B}_{13}, \ldots \ldots .$. are the basic pay in the successive stages of the revised scale corresponding to the basic pay $\mathrm{A}_{1}$ of the initial stage in the pre-revised scale. Similarly, $\mathrm{B}_{21}, \mathrm{~B}_{22}, \mathrm{~B}_{33}, \ldots \ldots \ldots$ are the basic pay in the successive stages in the revised scale corresponding to the basic pay $\mathrm{A}_{2}$ of the second stage in the pre-revised scale.
10.9.4 There is no simple formula for transition of basic pay at one stage in the pre-revised scale to the next. Each row in the $\mathrm{B}_{\mathrm{pq}}$ matrix is, therefore, distinctive in itself. The basic pay B in the revised scheme is a sum of two terms, namely AM and G, for which appropriate nomenclature may be sought. While the name grade pay, a term which has so far been used to denote basic pay, has been given to the component G , the product

AM presumably has been proposed to be known as 'band pay', or 'pay in the pay band'.
10.9.5 The above presumption has to be made on the basis of scrutiny of the Tables provided at the end of the West Bengal Services ROPA Rules 2009. Figures in these Tables (named 'fitment table in the revised pay band') are arranged according to the pattern shown in columns 2 and 3 of the Table 17 presented here. Accordingly, the figures in column 3, namely, $\mathrm{A}_{1} \mathrm{M}, \mathrm{A}_{2} \mathrm{M}, \mathrm{A}_{3} \mathrm{M}, \ldots \ldots \ldots \ldots$ which are M times larger than the figures in column 2 (i.e. $\mathrm{A}_{1}, \mathrm{~A}_{2}, \mathrm{~A}_{3}, \ldots \ldots \ldots$.) are to be regarded as 'band pay' in the revised scheme. The use of the term 'revised pay band' implies that there should be a 'pre-revised pay band' as well. Would it be appropriate to refer to the sequence in column $2\left(\mathrm{~A}_{1}, \mathrm{~A}_{2}, \mathrm{~A}_{3}, \ldots \ldots.\right)$ in Table 17 as the 'prerevised pay band' ? The two sets of numbers are, in fact, in the same ratio, namely, $\mathrm{A}_{1}: \mathrm{A}_{2}: \mathrm{A}_{3}: \ldots \ldots$.
10.9.6 The terms 'pay band' probably applies to the agglomeration of numbers that results from clubbing together of several pre-revised pay scales, each number representing the basic pay at a certain stage in a certain scale. The agglomeration of numbers does not generate an ordered sequence. It would not even be possible to mark off continuous segments of the agglomerate as characteristic of respective scales when the numbers are arranged in a sequence.
10.9.7 The number series $\mathrm{A}_{1} \mathrm{M}, \mathrm{A}_{2} \mathrm{M}, \mathrm{A}_{3} \mathrm{M}, \ldots .$. is relevant for the purpose of pay revision primarily when transition takes place from the prerevised to the revised scheme and fitment in the revised scale is the issue. The number series $\mathrm{B}_{11}, \mathrm{~B}_{12}, \mathrm{~B}_{13}$, representing the successive stages in
the revised scale is, however, relevant for progression in the revised scale, and that too for the case when the basic pay in the pre-revised scale is $\mathrm{A}_{1}$. The numbers may be rewritten in the following manner:

$$
\begin{aligned}
\mathrm{B}_{1} & =\mathrm{A}_{1} \mathrm{M}+\mathrm{G}=\mathrm{R}_{11}+\mathrm{G} \\
\mathrm{~B}_{12} & =\left(\mathrm{A}_{1} \mathrm{M}+\mathrm{G}\right) \mathrm{I} \\
& =\left[\left(\mathrm{A}_{1} \mathrm{M}+\mathrm{G}\right) \mathrm{I}-\mathrm{G}\right]+\mathrm{G}=\mathrm{R}_{12}+\mathrm{G} \\
\mathrm{~B}_{13} & =\left(\mathrm{A}_{1} \mathrm{M}+\mathrm{G}\right) \mathrm{I}^{2} \\
& =\left[\left(\mathrm{A}_{1} \mathrm{M}+\mathrm{G}\right) \mathrm{I}^{2}-\mathrm{G}\right]+\mathrm{G}=\mathrm{R}_{13}+\mathrm{G}
\end{aligned}
$$

and so on.
As basic pay in the revised scale has been defined as the sum of 'band pay' and grade pay, the number sequence $\mathrm{R}_{11}, \mathrm{R}_{12}, \mathrm{R}_{13}, \ldots \ldots \ldots .$. lays claim to its being assigned a name analogous to 'band pay', and that too for row 1 only. The number sequence $R_{21}, R_{22}, R_{23}, \ldots \ldots .$. would demand similar treatment for row 2.
10.9.8 The $\mathrm{B}_{\mathrm{pq}}$ matrix of Table 17 indicate that the identity of the basic pay in the pre-revised scale remains embedded in the basic pay in the revised scheme in two forms: first, as the product of the basic pay in the pre-revised scale and the multiplication factor 1.86, and the second as the product of last basic pay of the pre-revised scale and another multiplication factor (0.4). Both the strong and weak points of the pre-revised scheme are transmitted automatically to the revised scheme, albeit is a magnified form. The foremost among the weak point is the lack of order in the number systems representing the pre-revised pay scales. The degree of disorder is increased if two or more such systems are put together in a single basket. The concept of 'pay band' which borders on the idea of a single running
scale of pay with multiple entry points for the existing scales is inconsistent with such a disordered system.
10.9.9 An ideal situation would have been to get hold of an ordered system of numbers in which the existing scales, either in their present or slightly modified form, could be represented by different continuous segments, and distinguished by different entry points. Institution of artificial divisions in the line of a caste system by clubbing together of different segments could be easily done in this ordered system, but such an act would have been of no importance from the viewpoint of development of an elegant pay structure that may be translated into and summarized in a minimum number of simple, ready-to-use, and comprehensively informative conversion tables without taking a roundabout way to spell out the simple truth that the identity of all the existing scales has remained intact.

### 10.10 Decrease in the relative weight of basic pay in the revised scheme

10.10.1 One of the consequences of replacement of the booster element in the multiplication factor by grade pay is illustrated in the appended Table (Table 18 and 19). The first table shows the basic pay in the successive stages of the existing Scale No. 6 in its second column while the third column gives the grade pay for the scale as percentage of basic pay at the respective stages. Figures in the fourth column are obtained by adding 186 to the figures in the respective rows of the third column. The last column gives the basic pay in the revised scheme corresponding to the respective stages in the existing scheme. It may be noted that the figures the last column are obtainable though multiplication of the figures in the second column by the figures of the forth column in the respective rows.
10.10.2 The second Table has been derived from the figures of the second and the last columns of the first Table, which represent the basic pay in the successive stages of the existing and the revised scales respectively. The relative weight of basic pay at successive stages when the initial basic pay is taken as 100 is shown separately for the existing and the revised scales separately and placed side by side for comparison. The marked decrease in relative weight with advancing stages in the revised scale cannot escape notice. One may observe that there would have been no change in relative weight had the booster element been in position as a component of the multiplication factor instead of the concept of grade pay.

## Table 18

## Grade Pay as a variable booster element

Example: Pay Scale No. 6 (Rs.4125-9700)
Grade Pay as per CPC formula: $40 \%$ of Rs. $9700=3880$ (Rounded off to Rs.3900)

| Stage | Unrevised <br> Basic Pay <br> Srade Pay as <br> percentage of Basic <br> Pay | Factor by which unrevised Basic Pay has <br> to be multiplied to get revised Basic Pay x <br> 100 | Revised <br> Basic Pay |  |

| 29 | 236 | 191 |

### 10.11. Systematisation of pay scales

10.11.1 Table 20 shows how scales of pay for the non-teaching posts of the universities were defined on earlier occasions. A single set of numbers was adequate to describe a particular pay scale. Revision of pay implied replacement of one set of numbers by another. Transition from one scheme to the next was guided by a transformation formula. Representation of a revised pay scale by a single set of numbers was possible due to selection of the set prior to and somewhat independently of the transformation formula. Things would have been otherwise if the selection of the set was made exclusively on the basis of the transformation formula as is being done at present. The set of $n$ numbers representing a pre-revised scale would have yielded an $n$ x n matrix defining what one should have termed the domain of the corresponding revised scale. One set of numbers would have been adequate to describe the domain if the matrix had been symmetrical. The 3 percent increment formula opens the gateways for developing a symmetrical matrix. But such an attempt is frustrated as soon as the booster element is taken out of the multiplication factor of the transformation formula and assigned an independent status.

|  |  |  | 11325 |

Table 20

A fourth column may be added to the above Table as shown in Table 21 to describe the scheme arising out of revision of the ROPA-1999 scheme which can be done only with reference to Table 12

## Table 21

| Scale <br> No. | Description of the revised scale |  |
| :---: | :---: | :---: |
|  | The domain of the entire (PI + Q) <br> matrix of Table 12 starting with |  |
|  | Column no. | Row no. |
| 2 | 1 | 31 |
| 3 | 4 | 30 |
| 4 | 10 | 27 |
| 5 | 13 | 26 |
| 6 | 18 | 24 |
| 7 | 23 | 21 |
| 8 | 25 | 22 |
| 9 | 27 | 22 |

10.11.2 A pay domain for a revised scale would be completely defined if the figures in the first column of the domain as described in Table 12 are given. The
sequence of numbers in the first column is characteristic of the domain in the sense that all other figures within the domain may be obtained by applying the formula

$$
\mathrm{A}_{\mathrm{n}}=\mathrm{A}_{1}(1.03)^{\mathrm{n}-1}
$$

to the members of the first column. Since the figures in the first column do not belong to an ordered sequence, it would be necessary to quote the entire sequence for a complete description of the domain. One way of resolving the issue could be to mention the first and the last numbers of the sequence as indicated in Table 22 and let Table 12 take care of the rest. The pair of numbers is the distinguishing mark of the scale. The upper limit may vary in proportion as the number of stagnation granted in the pre-revised scales.

## Table 22

| Scale no. | Range of initial basic pay in the revised scheme |
| :---: | :---: |
| 1 | $7446-14781$ |
| 2 | $7964-16151$ |
| 3 | $8928-17431$ |
| 4 | $9557-18578$ |
| 5 | $10636-21008$ |
| 6 | $11615-22073$ |
| 7 | $12568-23996$ |
| 8 | $13334-25457$ |
| 9 | $14146-27007$ |

10.11.3 An alternative way of describing the domains can be devised on the basis of Table 10 where the columns marking the entry points to the domains of the revised scales contain the figures that define the P-series ('band pay' series) for the respective scales. Following the arguments developed in the preceding paragraph, the different scales may be distinguished on the basis of the pair of numbers indicated in Table 23.

Table 23

| Scale no. | Range of initial 'band pay' in the revised scheme |  |
| :---: | :---: | :---: |
| 1 | $5407-12742$ | plus 2039 as grade pay |
| 2 | $5736-13518$ | plus 2228 as grade pay |
| 3 | $6268-14771$ | plus 2660 as grade pay |
| 4 | $6650-15671$ | plus 2907 as grade pay |

| 5 | 7267-17124 | plus 3370 as grade pay |
| :---: | :---: | :---: |
| 6 | 7709-18167 | plus 3906 as grade pay |
| 7 | 8424-19852 | plus 4144 as grade pay |
| 8 | 8937-21061 | plus 4397 as grade pay |
| 9 | 9481-22343 | plus 4664 as grade pay |

10.11.4 The numbers of the type 5407, 5736, 6268, ......... 22343 belong to an ordered sequence ( $\mathrm{A}_{\mathrm{n}}=\mathrm{A}_{1} \mathrm{I}^{\mathrm{n}-1}$ ) and define a symmetrical matrix. As already pointed out, the figures in the first row or the first column would have been adequate to describe the revised pay scales in the conventional manner in all respects. This would have been possible if the booster element was not taken out of the multiplication factor of the transformation formula and replaced by the element of grade pay.
10.11.5 All the numbers in the $\mathrm{n} x \mathrm{n}$ matrix may not, however, be relevant for the purpose of describing the actual state of career progression. For example, the $51^{\text {st }}$ row in column 29 in Table 12 would represent a case where 30 years of service has already been rendered in the pre-revised Scale no. 9 and hence no further movement along the row is needed to describe the career path, unless, of course, there is a problem regarding removal of stagnation. Similarly, the box at the $50^{\text {th }}$ row of column 30 ordinarily relates to a case where 29 years of service has been rendered in the pre-revised scheme and one year of service in the revised scheme. There is thus no need for further movement along the $29^{\text {th }}$ row to describe the career path. Proceeding in the way, the box at the first row in column 58 may be regarded as relating to a case where the entire period of service would be spent in the revised scale. Beyond column 58, all the figures in the first row are ordinarily irrelevant for the purpose of describing the actual basic pay within the domain of the revised Scale no. 9. The diagonal of the $\mathrm{n} \times \mathrm{n}$ matrix marks the dividing line, so that only $1 / 2 \mathrm{n}(\mathrm{n}+1)$ numbers of the domain are relevant. For Scale no.9, the three limiting numbers are as shown in the following.

10.11.6 Similar considerations would apply to all other domains. A triangle of the type shown above can be constructed for each of the domains. The numbers at the three corners of the triangle are characteristic of the respective domain. The vertical arm of the triangle corresponds to the number series starting with row 1 and ending in row 30 of the column, which has already been shown to be representative of the domain, (Table 22). The horizontal arm of the triangle corresponds to a segment of the entire matrix which represents an ordered number sequence. The limits of the segment are defined by the first and the $30^{\text {th }}$ columns which are specific for the respective domain.

The limiting values of basic pay and 'band pay' for different segments corresponding to different scales are shown in the following Table.

## Table 24

A

| Scale No. | Limiting values of basic pay for the representative segments <br> of the number sequence |
| :---: | :---: |
| 1 | $7446-17546$ |
| 2 | $7964-18768$ |
| 3 | $8928-21040$ |
| 4 | $9557-22521$ |
| 5 | $10636-25065$ |
| 6 | $11615-27371$ |
| 7 | $12568-29618$ |
| 8 | $13334-31423$ |
| 9 | $14146-33336$ |

B

| Scale No. | Limiting values of 'band pay' for the representative <br> segments of the number sequence |
| :---: | :---: |
| 1 | $5401-15507$ |
| 2 | $5736-16540$ |
| 3 | $6268-17950$ |
| 4 | $6650-19614$ |
| 5 | $7267-21695$ |
| 6 | $7709-23465$ |
| 7 | $8424-25474$ |
| 8 | $8937-27026$ |
| 9 | $9481-28672$ |

10.11.7 The lower and the upper limiting values for a given segment are the lowest and the highest numerical values obtainable for basic pay within the corresponding domain. These segments, however, serve no purpose beside characterising the different domains and defining the career progression for new entrants to the revised scales. There is no direct method of deriving the entire matrix from these segments as has been possible in case of Table 22. When the numbers of the first column of a domain are known in Table 22, the other numbers can be obtained through row-wise successive multiplication by 1.03 and no additional information is needed. On the other hand, if the row-wise number segments are given (as in Table 24), one has to proceed by subtracting grade pay from the figure in row 1 of column 1 of the domain and fill in the rows of the same column by successive multiplication of the
figure so obtained by 1.03 . Addition of grade pay to all such figures in the successive rows would give a number series identical with the one given in Table 22. It is only by going through this stage that the entire matrix can be derived.
10.11.8 If transformation formula is made the sole basis of deriving a revised scale from a pre-revised scale, the representation of the revised scale in the conventional sense is feasible only if there is no other element in the transformation formula than the multiplication factor and the number series representing the successive stages of the pre-revised scales belong to an ordered sequence. The pay scale is replaced by a pay domain if such conditions are not fulfilled. Attention has been drawn to the problem of representing such domains in a simplified manner. A choice has to be made from several alternatives proposed here in this regard.
10.11.9 There are two alternative ways of grouping the domains in the pattern of 'pay bands' in line with the procedure adopted by the $6{ }^{\text {th }}$ Central and $5^{\text {th }}$ State by Commission as shown in the following Tables.

Alternative I: Classification according to range of basic pay (Vide Table 25)
(a) Classification according to range of initial basic pay in the revised scale (Table 25A)

Table 25

| $\begin{gathered} \text { Supergroup } \\ 8067-27007 \end{gathered}$ | Group |  | Subgroup |  |
| :---: | :---: | :---: | :---: | :---: |
|  | B1 | 7446-18578 | 1 | 7446-14781 |
|  |  |  | 2 | 7964-16151 |
|  |  |  | 3 | 8928-17431 |
|  |  |  | 4 | 9557-18578 |
|  | B2 | 10636-23996 | 5 | 10636-21008 |
|  |  |  | 6 | 11615-22073 |
|  |  |  | 7 | 12568-23996 |
|  | B3 | 13334-27007 | 8 | 13334-25457 |
|  |  |  | 9 | 14146-27007 |

(b) Classification according to minimum and
maximum value of basic pay obtainable within the
domains (ie. Range of basic pay for the new entrants to the revised scales) - Table 25 B

B

| Supergroup 8067-33336 | Group |  | Subgroup |  |
| :---: | :---: | :---: | :---: | :---: |
|  | B1 | 7446-22521 | 1 | 7446-17546 |
|  |  |  | 2 | 7964-18768 |
|  |  |  | 3 | 8928-21040 |
|  |  |  | 4 | 9557-22521 |
|  | B2 | 10636-29618 | 5 | 10636-25065 |
|  |  |  | 6 | 11615-27371 |
|  |  |  | 7 | 12568-29618 |
|  | B3 | 13334-33336 | 8 | 13334-31423 |
|  |  |  | 9 | 14146-33336 |

Alternative II: Classification according to range of 'band pay' (Vide Table 26)
(a) Classification according to range of 'band pay' at the entry points to the revised scale (Table 26A)

Table 26
A

| Supergroup | Group |  | Subgroup |  |
| :---: | :---: | :---: | :---: | :---: |
| $5 *$ | B1 | $5407-15671$ | 1 | $5407-12742$ |
|  |  | 2 | $5736-13518$ |  |
|  |  | 3 | $6268-14771$ |  |
|  |  | 4 | $6650-15671$ |  |
|  |  |  | $7267-17124$ |  |
|  | B2 | $7267-19852$ | 5 | $7709-18167$ |
|  |  | 6 | 7 | $8424-19852$ |
|  |  |  | $8937-21061$ |  |
|  | B3 | $8937-22343$ | 9 | $9481-22343$ |

(b) Classification according to minimum
and maximum 'band pay' obtainable
within the domains (ie. Range of 'band
pay' for the
new entrants to the revised
scales) - Table 26 B
B

| Supergroup | Group |  | Subgroup |  |
| :---: | :---: | :---: | :---: | :---: |
|  | B1 | $5407-19614$ | 1 | $5407-15507$ |
|  |  | 2 | $5736-16540$ |  |
|  |  | 3 | $6268-17950$ |  |
|  |  |  | $6650-19614$ |  |

|  | B2 | $7267-25474$ | 5 | $7267-21695$ |
| :--- | :--- | :--- | :--- | :--- |
|  |  | 6 | $7709-23465$ |  |
|  |  | 7 | $8424-25474$ |  |
|  |  | B3 | $8937-28672$ | 8 |

The classification schemes given in the aforesaid Tables are highly artificial in nature. The utility of such classification remains doubtful.

### 10.12 Pay scale of hostel / mess employees of the universities

10.12.1 The construction of pay structure of hostel / mess employees of the stateaided universities has been brought within the purview of the Pay Committee vide letter No.472-Edn (U)/1U-25/09 dated 11.08.09.
10.12.2 The Committee observes that the service rendered by the hostel / mess employees is confined to the hostels alone and they cannot be subjected to be transferred, save inter-hostel or intra-hostel transfers, like other groups of university employees and accordingly their services need to be treated differently in a separate cadre pertaining to the same group ['D'].
10.12.3 The Committee observes further that there is no similarity between the job performed by the hostel / mess employees and the job performed by the Cook, Assistant Cook etc. attached with the University Guest House. The employees working in the Guest House are very much part and parcel of the University establishment and are often called upon to receive, attend and look after the dignitaries during their stay. Sometimes they are required to work even at odd hours to serve the boarders in the guest houses.
10.12.4 Such posts are day by day becoming unnecessary and losing relevance as now-a-days most of the guest houses are required to be serviced by agencies and the special quality of food often required can not be prepared or served by the conventional cooks. In near future such posts may have to be abolished. Hence those posts cannot be taken into consideration for drawing any comparison for the purpose of the principle of 'equal pay for equal work'.
10.12.5 In this connection, the Committee notes that the Hon'ble High Court found "no substance in the contention of the petitioners that they are entitled to the scale of pay enjoyed by Group D staff of the University." The Committee notes further the following order passed by the Hon'ble High Court:
"The prayer for same scale of pay enjoyed by the Group D employees of the University is however dismissed." Hence the Committee upon due consideration finds that the theory of 'equal pay for equal work' does not hold good in this particular case.
10.12.6 Keeping all the above aspects in view the Pay Committee considers the construction of pay scale for the hostel / mess employees of the state-aided universities separately and they should be regarded as a distinctly different cadre in a different scale of pay.
10.12. 7 The P1 matrix of Table 10 and the (P1+Q) matrix of Table 12 may be used as a mode for the definition the domain of the revised pay scale for hostel and mess employees of the State-aided universities.
10.12.8 Table 27 shows the fitment of the basic pay at the successive stages of the pre-revised scale (here designated as Scale No.A1) for hostel and mess employees of the State-aided universities (2600-55-2985-60-3525-65-4175) to the Number Series

$$
\mathrm{A}_{\mathrm{n}}=2660 .(1.03)^{\mathrm{n}-1}
$$

Construction of the Table follows the same procedure as has been adopted in the case of Scale Nos. 1 to 9 .
10.12.9 The Grade Pay for Scale No. 1 is 0.7014 times 2907, the figure in the N -series to which the initial basic pay has been fitted. Accordingly, the value of grade pay for the revised scale A1 is calculated as follows:

## $2660 \times 0.7014=1866$

10.12.10 Based on Table 27, basic pay at the entry points of the domain of the revised scale A1 may be calculated according to the equation.

$$
\mathrm{B}=\mathrm{A} \times 1.86+1866
$$

10.12.11 The initial basic pay in the domain of the revised scale No. A1 has two components, namely, P (analogous to, 'Band Pay of the terminology of the $6^{\text {th }}$ Central Pay Commission and $5^{\text {th }}$ State Pay Commission) and Q or grade pay (Table 28). Basic pay in the successive stages in the revised scale A1 may be obtained on the basis of equation.

$$
B_{n}=B_{1} \cdot(1003)^{n-1}
$$

Table 27

| Successive members of the Number Series | Basic pay at successive stages in the pre-revised scale | Amount by which the figure in Col. 1 exceeds that of Col. 2 | Increase as percentage of basic pay |

| 26 | 4110 | 10045 | 10100 | 8179 | 1866 |
| 27 | 4175 | 10290 | 10300 | 8424 | 1866 |
| 28 | 4240 | 10543 | 10600 | 8677 | 1866 |

10.12.12 Table 28 gives the calculated value of basic pay at the entry points of the domain of revised Scale No. A1. Rounded off to the nearest 100, the initial basic pay in the revised Scale No.A1 ranges from 6900 to 10543. The calculated value of initial basic pay in the revised scale A1 ranges from 6814 to 10543 (Table 29). A ready reckoner is provided in Table 29.1 to show the initial basic pay in the revised scale after rounding off the calculated value to the nearest 100 and corresponding to basic pay at successive stages in the pre-revised scale. If the revised scale is assumed to be of 30 year span, the maximum basic pay in the domain would be 16600 . The calculated value of band pay ranges from 4948 to 10991 at the entry points to the revised scale A1 (vide Table 28). The maximum value of 'band pay' within the domain of revised scale A1 is 11661.
10.12.13 Cooks and Assistant Cooks of hostels and messes are to be placed in the revised scale A1. Two increments in the revised scale A1 are to be granted to the Cooks and one increment to the Assistant Cooks at the time of their entry to the revised scale, provided they have not earned such increments during their service career.

### 10.13 Summary of the scheme of revision of pay of non-teaching employees

10.13.1 A summary of the scheme of pay revision is given in Table 30. The number matrix shown in Table 12 is a finite segment of a theoretically infinite matrix. Table 12 may be used for defining domains of pay scales in the revised scheme corresponding to those in the pre-revised scheme.
10.13.2 Revision of pay implies substitution of a number matrix (here called pay domain) for a single set of numbers corresponding to a particular scale in the prerevised scheme. We have seen that the portions of the matrix of Table 12 beginning with column nos. $1,4,10,13,18,23,25,27$ and 29 represent the domains in the revised scheme corresponding to the pre-revised scales numbering 1 to 9 respectively.

Keeping in view the theoretical considerations that went into the construction of Table 12, one may conclude that any column in the matrix may be regarded as a potential candidate for definition of a pay domain within one and the same system irrespective of whether such a domain corresponds to a pay scale already defined in the pre-revised scheme or not. Accordingly, column nos. 31, 33, 35, 37, 39 and 41 may be chosen to mark the beginning of pay domains in the revised scheme which have no corresponding representatives in the pre-revised scheme, but which may be relevant for appropriate and systematic description of the promotional avenues for certain categories of employees which have their base posts already defined in the pre-revised scales.
10.13.3 It should be emphasized at the very outset that entry to these domains (here designated as P1 - P6) would be strictly for promotion only. They are, therefore, to be categorized as a group separate from the group of
nine domains in the revised scheme which have their corresponding representatives in the pre-revised scheme, notwithstanding the fact that the figures for both the groups are part and parcel of the same number matrix
10.13.4 Table 12 has been so constructed as to provide direct information on basic pay at all stages for all scales (or, domains) in the revised system. Calculations involved in the construction of Table 12 are rather simple and may even be viewed as commonplace. Once the Table is ready at hand, no harm is done if the calculations are forgotten altogether and attention is focused on the method of handling the array of numbers representing basic pay at all points within a domain.
10.13.5 A simple method of calculating 'band pay' at every point within a domain is to subtract the grade pay for that domain from basic pay at those points. Table 30 gives a comparative view of the range of values for basic pay and 'band pay' for different domains. The 'band pay' values for different domains would not, however, merge into a single number system as in the case of basic pay. There would be nine separate Tables corresponding to the nine pay domains.
10.13.6 The relative advantage of Table 12 is obvious from the fact that it comes in handy for providing nearly instantaneous replies to questions pertaining to fixation of pay during pay revision as well as during promotion, as also during progression within the domain A similar service cannot be expected from a Table constructed for description of 'band pay' within the domains, even if such construction is at all possible.

### 10.14 Date of Annual Increment

We recommend that annual increment under the revised scheme shall be admissible from the first day of the month of July every year, subject to the condition that a minimum period of six months must intervene between the date of entry to the revised scheme and the aforesaid date.

### 10.15 Scope for exercising option

10.15.1 The revised pay scales may be made applicable in all cases where the employees have been drawing salary in the respective prerevised scales prior to introduction of the present scheme, subject to the condition that such employees may be allowed to continue in the prerevised scales if they express their willingness in this regard. No such option need, however, be made available to the new entrants to the revised scales after 1.1.2006.
10.15.2 Fixation of initial basic pay in a revised scale with effect from 1.1.2006 shall be followed by further movement in terms of basic pay by way of granting admissible increments in the revised scale for the period intervening between 1.1.2006 and the date of implementation of the revised scheme.

## $10.16 \quad$ Allocation of pay scales for certain cadres

10.16.1 The pay structure constructed hereinbefore serves the purpose of providing revised version of the scheme of pay scales existing prior to 01.01.2006, which, in common parlance, is scale-to-scale to revision. The first attempt at allocation of pay scales to different cadres of the nonteaching category in the State-aided universities in a systematic manner was made early in 1979. A classification of cadres was instituted on the basis of minimum academic qualifications that were considered necessary for allocation of jobs to the respective cadres and each class was allotted a specific pay scale.
10.16.2 The three decades that have elapsed since the development of the classificatory scheme have seen many charges in the university set up. The question of quality building and quality enhancement in a globally competitive environment is becoming increasingly important in determining the composition of the work force in the university system and addressing the issue of job responsibility at various levels and the level of skill and basic training that would determine the extent to which people inducted to the university system would be able to accept such responsibilities.
10.16.3 The Pay Committee has been asked to examine the anomalies in the pay scales, if there be any, and suggest steps for removal. A total review of the scheme of allocation of pay scales to different cadres has been an inescapable necessity in view of the vast changes in the administrative and academic scene of the universities over the last three decades. Some of the anomalies could be located on the basis of the study
of the memoranda submitted by the associations/groups and through deliberations with their representatives. An in-depth study of the entire matter and interaction with the university authorities are, however, needed to develop a comprehensive view and to firm up any remedial suggestion. Our opinion in this regard will in general be incorporated in the next volume of the Report.
10.16.4 The Pay Committee has, however, observed that the anomalies in respect of three cadres, namely, Assistant Librarian II, Technical Assistant and Sub-Assistant Engineer, are too glaring to escape immediate attention. These cadres are borne in Scale No. 6 at the base level at present. We have compared the pay scales enjoyed by these cadres in similar academic institutions as well as in the Government sector. We are of the opinion that these group of employees deserves to be placed in a higher scale forthwith. Our predecessor Pay Committee chaired by Prof. R.K. Poddar had also considered this point and did recommend a higher scale for them.
10.16.5 Considering all the relevant aspects we recommend that the base level employees of these cadres be placed in Scale No. 8 of the proposed set-up. Notionally they may be placed in the unrevised Scale No. 8 w.e.f. 01.01 .1996 and stage-wise actual fixation in the revised scale may be made in the revised Scale No. 8 w.e.f. 01.01.2006.
10.16.6 The employees of the aforesaid categories at the $1^{\text {st }}$ level promotion and $2^{\text {nd }}$ level promotion be placed similarly in the proposed scales No.P1 and P2 respectively. Provision for stage-wise fixation may also be made for these cases.
10.17.1 This Pay Committee is also required to suggest/recommend revised pay scales attached to the posts of Officers of the West Bengal Council of Higher Secondary Education and West Bengal Board of Secondary Education. These officers are borne in the cadre of Assistant Secretary and Deputy Secretary in their respective organizations. At present pay scales attached to these two posts are identical with the unrevised scales of Assistant Secretary and Deputy Secretary in the State Secretariat. These scales are Rs.8000-275-13,500/- and Rs.10,000-325-15,525/-. There is also a scale of Rs.12000-375-8000/- which is basically a scale for Career Advancement.
10.17.2 The scale of Rs.8000-275-13,500/- is entry points scale of Group 'A' officers both in the State and Central Sector. The Sixth Central Pay Commission and State $5^{\text {th }}$ State Pay Commission recommended revision of these scales almost in the same way. While Central Pay Commission recommended inclusion of these scales in a Pay Band starting with Rs.15,660/- (Rs.15,660-39,100), the State Pay Commission included these scales in the Pay Band of Rs.9000-40,500/- with higher band pay of Rs.15660/- for the scale of Rs.8000-13,500/-. Both the Commissions have indicated entry level Band Pay for the other two scales also.
10.17.3 The officer associations have suggested that pay of Assistant Secretary, the entry level officers post be moved upward and notionally scale of Rs.10,000-15,525/- be taken as existing pay scale and revision be
considered on that basis similar should be the case in respect of Deputy Secretaries of these organizations.
10.17.4 We have already mentioned that the scale of Rs.8000-13,500/- is entry level post Group 'A' officers and also Assistant Secretary and Deputy Secretary of the State Secretariat are also borne in the same scales. Considering all the factors we are of the opinion that inter sector relativity in respect of these posts should not be disturbed. We recommend revision of the scales in the following manner.

| SL No. | Existing Pay Structure | Revised Pay Structure |  |
| :---: | :---: | :---: | :---: |
| a) | $8000-275-13,500$ | $15,660-40,500$ | 5400 |
| b) | $10,000-325-15,525$ | $15,660-40,500$ <br> [entry Band Pay <br> Rs.18,600] | 6600 |
| c) | $12,000-375-18,000$ | $15,660-40,500$ <br> [entry Band Pay <br> Rs.22,320] | 7600 |

10.17.5 Regarding fixation in the revised scale in respect of officers of these two organizations we suggest adoption of the principle recommend by the $5^{\text {th }}$ State Pay Commission. The principle would be:

An officer may be allowed option to draw pay in the existing scale, until the date on which he earns his next or nay subsequent increment or until he reaches his post or ceases to draw pay in that scale,
i) The pay of an officer who continued in the service after 31.12.2005 may be determined subject to his as on 01.01.2006 by multiplying his existing Basic Pay by a factor of 1.86 and rounding off the resultant figure to the next multiple of 10 .
ii) In addition to the pay in the Pay Band, Grade Pay corresponding to existing scale will be payable. The Basic Pay at any particular time will be aggregate of the pay in the Pay Band and Grade Pay.
10.17.6 The rate of increment in the revised pay structure will be $3 \%$ of the pay in the Pay band and Grade Pay applicable which will be rounded off to the next multiple of 10 . The amount of increment will be added to the existing pay in the Pay Band.

### 10.18 Users' Manual <br> (Based exclusively on Table 7.2 and Table 12.1)

10.18.1 Fixation of initial basic pay in the revised scale.

The following steps are to be gone through during fixation of initial basic pay of an employee in the revised scale:
(a) To ascertain the scale in which the salary of the concerned employee has been drawn on 01.01.2006;
(b) To visit Table 7.2 which is meant to serve as a ready reckoner for fixation of initial basic pay in the revised scale;
(c) To visit the Sub-Table for the concerned scale in Table 7.2 and to identify the figure in column 2 that represents the basic pay drawn on 01.01.2006;
(d) To identify the figure in column 3 of the Sub-Table that has been placed side by side with the aforesaid figure of column 2 as the initial basic pay in the revised scale.
[Example : In the Sub-Table for Scale No.8, figures 7950 and 19700 are placed side by side in the same row in columns 2 and 3 respectively. An employee drawing basic pay of 7950 in the pre-revised scale will be entitled to draw 19700 as initial basic pay in the revised scale.]

### 10.18.2 Determination of basic pay in successive stages after

The following steps are to be gone through for the determination of basic pay in successive stages after fixation of pay in the revised scale.
(a) To visit Table 12.1. To note that the names of different scales have been entered at the top of some chosen columns of the Table;
(b) To identify the column bearing the number of the scale in which the concerned employee is entitled to draw salary;
(c) To go down the column and reach the box that carries the figure representing the basic pay in the revised scale as obtained on the basic of procedure described in para 10.15.1.
[Example : Column 27 of the Table 12.1 has been earmarked for Scale no.8. The figure 19700 occurs in a box in the $40^{\text {th }}$ row of the column].
(d) To move along the row containing the aforesaid box in steps corresponding to the number of annual increments. The figures within the box where one reaches after such movement is the basic pay after earning the corresponding number of increments.
[Example : The $40^{\text {th }}$ row contains the figures for basic pay at successive stages when the initial basic pay is 19700 . Moving step-wise along the row, one obtains the figures 20200, 20900
and 21500 as basic pay after earning one, two and three increments respectively in the revised scale].
10.18.3. Determination of basic pay in a case when an employee has earned promotion or career advancement after 01.01.2006.

The following steps are to be gone through as a purely temporary arrangement in case of an employee who has earned promotion/career advancement after 01.01.2006. The recommendations of the Committee in regard to promotion and career advancement are being finalized shortly.

The procedure will be illustrated by the example described in para 10.15 .1 where the basic pay of an employee borne in Scale No. 8 has been fixed at 19700 with effect from 01.01.2006.
(a) To move row-wise from the box showing the basic pay in the revised scale by a number of steps equal to the number of years elapsed between 01.01.2006 and the year of promotion;
(b) To move one step further in the same direction;
(c) To move diagonally upwards therefrom by three steps. The figure within the box where one reaches is the basic pay admissible to the employee on the date of promotion.
[Example : An employee whose initial basic pay in the revised scale is 19700 earns two increments in the revised scale if
promotion has been granted in 2008, besides an additional increment admissible during promotion. Three-step row-wise movement corresponding to the three increments leads one to column 30, row 40. Diagonal movement therefrom by three steps will lead to a box in column 33, row 37. The figure within the box is 21900 , which is the basic pay admissible on the date of promotion.]

Counting of steps along a diagonal in the PI matrix may be regarded as an arduous task. Counting of steps along a row or a column is, however, a simple matter. Movement by a certain number of steps along the diagonal may be achieved through a combination of row-wise and column-wise movement by an equal number of steps. The procedure can be illustrated by means of the following diagram which shows how a four-step movement from the box containing A along the diagonal to reach the box C may be regarded as a combination of row-wise movement by four-steps from A which lead to B , followed by column-wise movement by four steps again from $B$.

|  |  |  |  | $\mathrm{C} \circ$ |
| :---: | :---: | :---: | :---: | :---: |
|  |  |  |  | $\circ$ |
|  |  |  |  | $\circ$ |

Steps of row-wise movement (from A to B ) are indicated by solid circles and steps of column-wise movement by open circles.

## CHAPTER 11

## ALLOWANCES

11.1 As per terms of reference this Committee is to examine the allowances and benefits in addition to pay. Due to time constraints as well as due to absence of required inputs we have not been able to study and evaluate all types of allowances that the Universities, Higher Secondary Council and Board of Secondary Education currently pay to their employees. Our discussion in this chapter would be restricted to three types of major allowances now available to these of group of employees viz., Dearness Allowance, Medical Allowance and House Rent Allowance. We propose to deal with other allowances in the next volume to be submitted shortly.
11.2 In respect of all the allowances we are unable to discuss now, we recommend that these allowances for the time being and till specific recommendations are made by this Committee, be allowed to be drawn at the same rate as are being drawn now. May be that some of the allowance are worked out on percentage of the basic pay. In such cases also this amount should not be altered.

## 11.3 <br> Dearness Allowance

11.3.1 Of the three major allowances mentioned in para 11.1, we are taking up Dearness Allowances first. Erosion of real value of basic salary on account of inflation necessitates payment of dearness allowances. Consequently, the D.A. admissible is correlated to the inflation.
11.3.2 It is observed that the State Govt. which is following principles followed by Govt. of India in the matter of calculation of the quantum of each instalment of Dearness Allowance, generally grants the same quantum of dearness allowance to these group of employees as it grants to its own employees.
11.3.3 Some of the Service Associations have expressed grievances that sometimes there is delay on the part of respective Administrative Departments of the Universities in releasing the Dearness Allowance after it is sanctioned by the Finance Department of the State Govt. They also pointed out that one instalment of dearness allowance covering the period from 01.07.2003 to 31.12 .2003 has not been sanctioned for the university employees.
11.3.4 It has been observed that time taken for release of Dearness Allowance in some cases varies from University to University as administrative Department of the respective University is required to issue order individually.
11.3.5 We recommend that Dearness Allowance to these group of employees be paid at the same rate as may be paid to the State Govt. employees. We also recommend that the unpaid instalment of the Dearness Allowance for the period 01.07.2003 to 31.12.2003 be released. Regarding time lag in issuing sanction by various Departments we would suggest that Finance Department should itself take action so that orders are issued in a synchronized way by all the concerned Departments of the State Govt.

### 11.4 House Rent Allowance:

11.4.1 At present employees of the State-aided Universities, Higher Secondary Council and Board of Secondary Education enjoy house rent allowance @ $15 \%$ of the Basic Pay subject to the maximum of Rs.2000/i.e. in accordance with the principle adopted by the State Govt. for the State Govt. employees and for the employees who are under the rule making authority of the State Govt.
11.4.2 Some of the Service Associations in the course of their deposition and in their memoranda suggested some changes. Some of them demanded HRA of at the rate $20 \%$ of the basic pay while some demanded $30 \%$ for the Universities situated in Kolkata and $15 \%$ or $20 \%$ for other Universities. The Committee has observed that the State Govt. is following this principle of $15 \%$ HRA since 01.02 .1977 only the ceiling limit being changed during subsequent pay revision. No distinction has been made between employees situated in city and rural areas.
11.4.3 Taking into account all the aspects this Committee feels that the principle recommended by the $5^{\text {th }}$ State Pay Commission and adopted by the State Govt. in respect of HRA be also applicable to these group of employees i.e. drawal of this allowance be fixed at $15 \%$ of revised basic pay subject to a ceiling of Rs.6000/- per month. This ceiling amount is to operate on the total of HRA by the two individual spouses when they reside in the same accommodation.
11.4.4 It has come to the notice of the Committee in respect of the employees who are occupying University accommodation there is no uniform norms for granting HRA and realization of rent. We recommend that HRA should not be granted to an employee who has been allowed a habitable unit of accommodation by the authority. Regarding realization of rent State Govt. norms in this regard may be followed.

### 11.5 Medical Allowance:

11.5.1 The employees of these institutions are now getting Medical Allowance at the rate of Rs.100/- per month i.e. at the same rate of the State Govt. employees used to receive prior to the last revision of pay scales. On the basis of recommendation of $5^{\text {th }}$ State Pay Commission, State Govt. has since enhanced this amount to Rs.300/- we recommend that these employees be paid, in the same line, Rs.300/- per month as Medical Allowance. In addition to this fixed Medical Allowance, there are other facilities like free consultation with Medical Officers, reimbursement of medical expenses, to an extent in some institutions. There is, however, no uniform norms. This benefit should continue.
11.5.2 It has been brought to the notice of this Committee that State Govt. has recently formulated a scheme viz. The West Bengal Health Scheme, 2008 for treatment of serving State Govt. employees and State Govt. pensioners. The Service Associations suggested formulation of a similar health scheme for these employees.
11.5.3 The committee had a chance to peruse the scheme. Though the scheme will not be totally hassle free, yet it would generally be beneficial for the employees. We would therefore, suggest that the State. Govt. may consider formulation of a similar Health Scheme for these groups of employees as well.

## CHAPTER 12

12.1 As per terms of reference we are to calculate and indicate costs of the recommendations proposed by us. To calculate the cost of recommendations we are to assume date(s) of effect.
12.2 The pay scales recommended by the last Pay Committee were implemented from 01.01.96. The staff associations who represented before us demanded implementation of revised scales with effect from. 01.01.2006.
12.3 In the proposed pay structure we have suggested notional merger of dearness allowance equivalent to a Govt. of India employee was drawing on 01.01.2006.
12.4 The State Govt. on the basis of recommendations of the $5^{\text {th }}$ State Pay Commission extended the benefits of the revised pay structure with effect from. 01.01.2006 notionally and from 01.04.2006 actually.
12.5 Considering all the aspects this Committee suggests that revised pay structure be implemented with effect from. 01.01.2006. The fixation of pay in the revised pay structure should be with effect from. 01.01.2006. We are leaving it to the State Govt. to decide date of notional fixation, if there be any, and date of actual payment. The Committee, however, suggests that actual payment should not be from any date later than the date decided by the State Govt. in respect of the State Govt. employees.
12.6 We are making the estimate on the basis of actual expenditure being incurred by the universities during May, 2009. As matters related to retiring benefits could not be dealt with in this chapter, the present estimate does not include the cost related to pension, commutation of pension and gratuity etc. This portion will be included in the volume II of the report to be submitted shortly.
12.7 As per statement furnished by the institutions covered in this volume the total number of non-teaching employees of the universities is 14464 and total number of employees in Council and Board is 1130. Out of the total number of employees, in position is 9240 . There are 6352 vacant posts. So total number of employees to be involved is roughly 15,000.
12.8 The financial implication per annum may be summarized as follows :-
(a) Estimated cost on pay, DA \& HRA in the revised scale (as on 01.05.2009) - Rs. 259 crore
(b) Pay, DA \& HRA in the existing scale (approx.) (as on 01.05.2009) - Rs. 185 crore
(c) Estimated additional financial implication :

## CHAPTER 13

## SUMMARY OF RECOMMENDATIONS

13.1 In this Chapter in two sections we have summarized the principles adopted in determining the revised pay structure and our recommendations made in different chapters.
13.2 Summary of principles of determination of revised pay structure and fixation of pay in revised scale
13.2.1 The Pay Committee has adopted the formula of annual increment at a fixed rate proposed by the $6^{\text {th }}$ Central Pay Commission and the $5^{\text {th }}$ State Pay Commission towards ensuring a uniform growth rate for all scales.
13.2.2 To realize the full potential of the 3 percent increment formula, the Pay Committee has selected a number series defined by the equation $\mathrm{A}_{\mathrm{n}}=\mathrm{A}_{1} .(1.03)^{\mathrm{n}-1}$ to which the basic pay at all stages in all the existing scales have been fitted prior to application of the transformation formula.
13.2.3 The Pay Committee has adopted the transformation formula proposed by the $6^{\text {th }}$ Central Pay Commission and the $5^{\text {th }}$ State Pay Commission for fixation of initial basic pay in the revised scales, namely

$$
\mathrm{B}=\mathrm{AM}+\mathrm{G}
$$

where $\mathrm{B}=$ initial basic pay in the revised scale, $\mathrm{A}=$ basic pay in the corresponding prerevised scale, $\mathrm{M}=1.86$ and $\mathrm{G}=$ grade pay.
13.2.4 A in the present case is the rationalized version of the basic pay in the pre-revised scales, and Gequals 40 percent of the basic pay at the end of the respective scales in the rationalized version.
13.2.5 The product AM appears to be similar to 'band pay' of the terminology of the $6^{\text {th }}$ Central Pay Commission and $5^{\text {th }}$ State Pay Commission. The 'band pay' values for different scales define distinct segments of a single continuous number serious.
13.2.6 Application of the 3 percent increment formula to the value of initial basic pay $(B=M+G)$ defines the basic pay in the subsequent stages of the respective revised scales. All such values taken together define the domains of basic pay for the respective revised scales.
13.2.7 The domains of 'band pay' (=basic pay - grade pay) corresponding to domains of basic pay for each of the scales have also be defined.
13.2.7 A scheme for classification of the domains of basic pay and domains of 'band pay' has been provided.
13.2.8 Table 7.2 and Table 12.1 would serve as ready reckoners for the determination of basic pay in a hassle-free manner at the entry point of the revised scales, in their subsequent stages, and consequent upon promotion/career advancement.

### 13.3 Summary of recommendations

13.3.1 The recommendations in this volume covers pay structure and three major allowances viz., D.A, H.R.A. \& M.A. in respect of the employees of the institutions included in Finance Department's Resolution No.8349-F dated 10.11.08 and Finance Department's Order No.8827-F dated 25.11.2008. Recommendations in respect of the employees included as per Finance Department's Order No.8476-F dated 01.09.2009 will be given in the next volume to be submitted shortly.
13.3.2 The Committee suggested a pay structure with band pay and grade pay for cadres now in the pay scales, like the $5^{\text {th }}$ State Pay Commission but in respect of pay scales from 1 to 9 in modified form and in identical form in respect of officers of the Council of Higher Secondary Education and Board of Secondary Education (Chapter 10, para 10.13 (Table 30) and para 10.17.3).
13.3.3 Fixation of pay in the revised pay scales suggested (paragraph 10.3 and 10.17.5).
13.3.4 Procedure for calculation of increment suggested (paragraph 10.3 and 10.17.6).
13.3.5 Principle of fixation of pay for direct recruits on and after 01.01.2006 suggested.
13.3.6 Allocation of pay scales in the revised pay structure for three cadres in variance with unrevised scale suggested (paragraph 10.16).
13.3.7 A fixed date namely, $1^{\text {st }}$ July suggested for annual increment (paragraph 10.14).
13.3.8 Payment of Dearness Allowance at per with State Govt. employees suggested (paragraph 11.3.5).
13.3.9 Payment of unreleased instalment of D.A. in respect of the period from 01.07.2003 to 31.12.2003 suggested.
13.3.10 H.R.A. has been suggested @ Rs. $15 \%$ of the revised basic pay subject to the maximum of Rs.6000/- (paragraph 11.5.3).
13.3.11 Medical Allowance @ Rs.300/- per month instead of Rs.100/- has been suggested. Also suggested introduction of a Health Scheme (in line with State Government's Health Scheme, 2008) for the employees included in the terms of reference of this Committee (paragraph 11.5).
13.3.12 Date of effect as 01.01 .2006 suggested.
13.3.13 Suggested publication of Compendium of Govt. Orders relating to the Universities issued by the Higher Education Deptt. every year. (Paragraph 8.12)

## CHAPTER 14

## CONCLUSION

A Pay Committee is required to make a thorough study of the existing pay scales, to examine whether the pay scales are in consonance with the job responsibilities, to see if there are any anomalies anywhere and to rationalize it on the basis of scrutiny of the pay structure in its entirety with a view to bringing an order and harmony. The present Committee has been working meticulously in this direction.

It will not be out of place to mention that this volume of the report could have been prepared much earlier if the required infrastructure had been available immediately after the notification and the inputs from the universities could reach this office within the stipulated time frame. We are yet to receive all the required information from a few universities till date. Nevertheless, with our best efforts we have arrived at the recommendations made in this volume of report, which, we believe, will be useful to all concerned.

We are thankful to all who had submitted their memoranda different unions, associations and individuals - stating therein their proposals with justifications. Their submission at the time of hearing helped the Committee have a clear picture of the problems they are in. They have provided us with useful data/information without which it might be difficult for us to prepare this report at this point of time.

We are grateful to the state government for its cooperation in all respects.

We take this opportunity to thank all the members of staff working in this office for rendering a praiseworthy service. We hope their sincere assistance will enable us to submit the next volume of the report shortly.

Table 1 Application of transformation formula, development of pay scales and extent of agreement with an ordered number series

## Table 6.1

Scheme of fitment of basic pay at successive stages in the existing scales to the number series adopted for systematisation of the existing scales prior to conversion to the revised scales. Sequential order is maintained in both the series in order to demonstrate one to -one correspondence between the two.

| Number series (henceforth to be called the N -Series) adopted for systematisation of | Basic pay at successive stages in the existing scales. |  |  |  |  |  |  |  |  |

## Table 7.1

Basic pay at the entry points in the domains of revised scales corresponding to the basic pay at different stages in the respective pre-revised scales

The Table also shows 'band pay' and grade pay at the entry points of the domains.
All figures in columns 3, 5 and 6 are parts of a rationalised system.

| A |  | Scale no. 1 |  |  |  |
| :---: | :---: | :---: | :---: | :---: | :---: |
| Pre-revised scale |  | Basic pay in the revised scale * |  | Components of basic pay in the revised scale |  |
| $\begin{aligned} & \mathbb{O} \\ & \underset{\sim}{*} \end{aligned}$ | Basic pay | Calculated value | Value rounded off to next 100 | 'Band Pay' | Grade pay in the revised scale |
| 1 | 2850 | 7446 | 7500 | 5407 | 2039 |
